Electronics Letters

VOLUME 11 1975

THE INSTITUTION OF ELECTRICAL ENGINEERS

Electronics Letters

THE INSTITUTION OF ELECTRICAL ENGINEERS

ELECTRONICS LETTERS is published fortnightly. Price: £5·00 (US$12·00) per issue; annual subscription in UK £47·00, Overseas £55·00 (US$132·00). Second-class postage paid at New York, NY. US mailing agent: Air & Sea Freight Inc., 527 Madison Avenue, Suite 1217, New York, NY 10022; USA. All copies for North America are sent by Air Freight to New York. Airmail direct to subscriber at an additional charge of £18·00 (US$43·20). Available also in a concurrent microfiche edition at the same subscription rate as for the printed edition. Subscribers to both the printed and microfiche editions are given a 50% discount on the price of the microfiche edition

All subscription inquiries and orders should be sent to the Publication Sales Department, IEE, Station House, Nightingale Road, Hitchin. Herts. SG5 1RJ, England. Telephone Hitchin 53331 (s.t.d. 0462 53331), Telex 261176. Advertisement correspondence should be sent to the Advertisement Department, at the same address. All other correspondence, including manuscripts, should be sent to: IEE Publishing Department, PO Box 8, Southgate House, Stevenage, Herts. SG1 1HQ, England. Telephone Stevenage 3311 (s.t.d. 0438 3311), Telex 261176, Telegrams Voltampere Stevenage, England

Contributions should be addressed to the Executive Editor, *Electronics Letters*, Publishing Department, Institution of Electrical Engineers, PO Box 8, Southgate House, Stevenage, Herts. SG1 1HQ, England
There is no page charge

This publication is copyright under the Berne Convention and the International Copyright Convention. All rights reserved. Apart from any copying under the UK Copyright Act 1956, part 1, section 7, whereby a single copy of an article may be supplied, under certain conditions, for the purposes of research or private study, by a library of a class prescribed by the UK Board of Trade Regulations (Statutory Instruments, 1957, no. 868), no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is, however, not required to copy abstracts of papers or articles on condition that a full reference to the source is shown. **Multiple copying of any part of the publication without permission is always illegal**

The IEE appreciates that, on certain occasions, it could be very useful for organisations to be able to make copies of articles and papers. An IEE licensing arrangement exists whereby organisations entering into an agreement are legally entitled to make up to ten copies of an IEE paper or article. Full details may be obtained from the IEE Publishing Department at the above address

The IEE is not as a body responsible for the opinions expressed by individual authors

The IEE is a member of the Association of Learned & Professional Society Publishers

Publishing Department:

PO Box 8
Southgate House
Stevenage
Herts. SG1 1HQ

Subject index

ñ

100 Mb/s optical-repeater experiment employing graded-index fibres. K.Nawata, K.Takano, T.Ikegami and S.Ohara 583
106 GHz low-loss beam waveguide. I.Anderson and J.T.Ruscio 213
1/f noise produced by radio-frequency current in resistors. E.J.P.May and W.D.Sellars 544

A

Accuracy of the CCIR F2 layer model at low and middle latitudes. J.W.King, J.C.Samuel and G.Thuillier 366
Acoustic beams, spatially orthogonal, simultaneous storage of, in a Schottky-diode memory correlator. K.A.Ingebrigtsen 585
Acoustic-surface-wave convolver on epitaxial gallium arsenide. A.O.W.Spiermann 614
Acoustic-surface-wave delay line, passive coded transponder using an. D.E.N.Davies, M.J.Withers and R.P.Claydon 163
Acoustic-surface-wave disc delay line, optics of propagation in the anisotropy space of an. I.M.Mason, E.Papadofrangakis, J.Chambers and R.Ulrich 348
Acoustic-surface-wave filter, coupled resonator. M.Redwood, R.B.Topolevsky, R.F.Mitchell and J.S.Palfreeman 253 Errata 568
Acoustic-surface-wave filter, investigation of intermodulation in. G.Coussot 116
Acoustic surface-wave filters without apodisation loss with electrodes with inclined apodisation. K.Hohkawa, F.Ishihara and S.Yoshikawa 259
Acoustic-surface-wave multistrip couplers, lossy, attenuation and phase distortion in. O.Schwelb and E.L.Adler 342
Acoustic-surface-wave oscillator, programmable. P.Hartemann 119
Acoustic-surface-wave planar resonators, laser-probe analysis of field distributions. I.M.Mason, J.Chambers and P.E.Lagasse 288
Acoustic-wave convolver, surface-, correlation of long sequences by a, with application to spread-spectrum communication. D.P.Morgan and J.M.Hannah 193
Acoustic-wave resonator filters, surface-, electri-

cally cascaded. P.S.Cross, R.S.Smith and W.H.Haydl 244
Acoustic-wave, surface-, phase shifter, magnetically tuned. A.K.Ganguly, K.L.Davis, D.C.Webb, C.Vittoria and D.W.Forester 610
Acoustic waves, bulk, convolution and correlation using light diffraction from. J.M.Rouvaen, E.Bridoux, R.Torguet and C.Carles 281
Acousto-optic filter, noncollinear, analysis of the I.C.Chang 617
Acousto-optical image conversion, real-time. B.Dalannoy, G.Thomin and M.Moriamez 334
Active circuits, linear, node elimination in. M.G.Rezai-Fakhr and G.C.Temes 121
Active filters, wave. A.G.Constantinides and G.Haritantis 254
Active filters, wave, based on unit-element prototypes. Su-Ming Ng and W.H.Ku 578
Active network, practical minimum-capacitance very-low-frequency RC. G.Wilson 443
Active RC network, new multiple feedback. D.J.Perry 364
Active RC realisation of a 3rd-order bandpass Butterworth characteristic using equal-valued passive elements. F.Anday 228
Active RC structures, lowpass, application of capacitance minimisation to. J.Dunning-Davies and F.W.Stephenson 198
Aggregated models for high-order systems. G.Michailesco, J.M.Siret and P.Bertrand 398
Aggregation matrices for a class of low-order models for large-scale systems. J.Hickin and N.K.Sinha 186
Algorithm for the evaluation of $(sI-A)^{-1}B$ from signal-flow graphs not involving the complex variable s. I.C.Goknar 235
Alternative way for numerical steady-state analysis of forward-biased p-n junction devices. Ph.Leturcq and A.Munoz Yague 465
Alumina microstrip GaAs f.e.t. 11 GHz oscillator. N.A.Slaymaker and J.A.Turner 300
Amorphous-semiconductor device, novel 3-terminal. A.Madan, M.J.Thompson and J.Allison 496
Amplifier configurations by feedback action, complete description of the basic. M.Drosg 69
Amplifier, single, multipurpose simulation network with a. C.E.Schmidt and Man Shek Lee 09
Amplifier systems with quasifeed-forward control. K.B.Klaassen, R.J.de Kok and J.C.L.van Peppen 400
Amplifiers, multistage feedback, stability analysis of, in terms of element-perturbation theory. T.B.M.Neill 639
Amplifiers, signal-error-feedforward-controlled. K.B.Klaassen, R.J.de Kok and J.C.L.van Peppen 250 Errata 396
Amplitude storage, phase and, of an acoustic signal in a Schottky-diode correlator. A.G.Bert and G.Kantorowicz 523
Analogue values represented by pulse width, circuit to compute $(x^2 + y^2)^{1/2}$ for. H.Ikeda 536
Analysis of a wide range of microwave resonators: t.l.m. methods (Computer-program Description). S.Akhtarzad and P.B.Johns (Computer-program description) 599
Analysis of the noncollinear acousto-optic filter. I.C.Chang 617
Angular dependence of the mode-coupling coefficient in a multimode optical fibre. L.Jeunhomme and J.P.Pocholle 425
Antenna, broadband cylindrical, with continuous resistive and concentrated capacitive loadings. B.D.Popović, M.B.Dragovic and D.J.Paunovic 611
Antenna, optimal broadband cylindrical, with one and two lumped capacitive loadings. B.D.Popović, M.B.Dragovic and A.R.Djordjevic 99
Antenna, plane equiangular 4-arm spiral, with conical reflector. G.Grekou, G.Dubost and A.Madani 38
Antenna, plane equiangular 4-arm spiral, with conical reflector and cavity, fitted into a structure. G.Grekou and G.Dubost 169
Antenna, Yagi, calculation of radiation patterns of a, above imperfectly conducting ground (Computer-Program Description). P.S.Hall, B.Chambers and P.A.McInnes (Computer-program description) 550
Antennas, array, choice of grid configuration of. B.N.Das and J.S.Rao 170
Antennas, h.f. Yagi, microwave modelling of, over real ground. P.S.Hall, B.Chambers and P.A.McInnes 187
Antennas, inductive-loaded, signal/noise ratio of. P.A.Ramsdale 590
Antennas, multiple-beam, expression for decoupling in. L.Lewin 420
Antennas, short integrated, signal/noise ratio for. T.S.M.Maclean and P.A.Ramsdale 62
Antennas with nonlinear loads, transient response of. F.M.Tesche and T.K.Liug 18
Antenne spirales equiangulaires planes a quatre brins a reflecteur conique et a cavite, encastree dans une structure (Plane equiangular 4-arm spiral antenna with conical reflector and cavity, fitted into a structure). G.Grekou and G.Dubost 169
Antenne spirales equiangulaires planes a reflecteur conique (Plane equiangular 4-arm spiral antenna with conical reflector). G.Grekou, G.Dubost and A.Madani 38
Application of capacitance minimisation to lowpass active RC structures. J.Dunning-Davies and F.W.Stephenson 198
Applications of the perturbation matrix in network design problems. M.I.Sobhy and A.S.Deif 294
Approxmate identification of automata. B.R.Gaines 444
Array antennas, choice of grid configuration of. B.N.Das and J.S.Rao 170
Arrays for generating arbitrary mask vectors. D.D.Gajski 442
Asynchronous arbiter, n-user. P.Corsini 01
ATS-6 satellite 20 GHz propagation measurements at low elevation angles. W.L.Stutzman, C.W.Bostian, E.A.Manus, R.E.Marshall and P.H.Wiley 635
Attenuation and phase distortion in lossy acoustic-surface-wave multistrip couplers. O.Schwelb and E.L.Adler 342
Attenuation by cloud and rain on earth-sun paths at 12 to 71 GHz. P.G.Davies 547
Attenuation characteristics of multimode optical fibre with lossy cladding and lossy jacket. R.Roberts 529
Automata, approximate identification of. B.R.Gaines 444
Avalanche diode, GaAs double-drift, from vapour-phase epitaxy. W.Tantraporn and S.P.Yu 196
Avalanche diodes, gallium-arsenide, charge-limited domains in. B.Culshaw, P.A.Blakey and R.A.Giblin 102
Avalanche diodes, gallium-arsenide, equal-areas rule for. J.E.Carroll, B.Culshaw and R.A.Giblin 316

B

B.J.T. frequency doubling with sinusoidal output. R.W.J.Barker 106
Background subtraction in surface-wave holography. A.E.Ash and H.K.Wickramasinghe 526
Band-elimination filter employing surface-acoustic-wave resonators. Y.Koyamada, F.Ishihara and S.Yoshikawa 108 Errata 312
Bandpass Butterworth characteristic, 3rd-order, active RC realisation of a, using equal-valued passive elements. F.Anday 228
Bandpass filter, parallel-coupled, effect of difference in odd- and even-mode wavelengths on a. D.Kajfez and S.Govind 117
Bandpass filters, digital, new squared-magnitude function for. S.N.Hazra 315
Bandpass filters, realisability of, J.Neirynck and Dao Manh Cuong 256
Barker sequences, optical, and self-orthogonal convolutional codes. P.S.Moharir 124
Basic T matrix patterns for 2-port linear transformation networks in the real domain. J.Glover Errata 32
Beam squint in circularly polarised offset-reflector antennas. N.A.Adatia and A.W.Rudge 513
Bias-tuned double-drift IMPATT diodes for wide-bandwidth operation. R.S.Ying and D.H.Lee 345
Bilinear systems, descent algorithm for the optimisation of. D.H.Owens 335
Binary sequences, filtered, with no skewing. K.R.Godfrey 456
Binary sequences up to length 40 with best possible autocorrelation function. J.Lindner 507
Binary sequences with good correlation properties. U.Somaini 278
Bipolar-transistor-analysis algorithm, 2-dimensional, comparison of numerical-solution methods for. C.R.Jesshope, E.J.Zaluska and H.Kemhadjian 285
Bipolar transistors, measurement of the base resistance of. G.C.M.Meijer and H.J.A.de Ronde 249
Bit error probability properties of Gray-coded m.p.s.k. signals. C-E.Sundberg 542
Bonding and interconnections for c.c.d.s. K.A.Jaggers 161
Bonding, transducer, with primed anaerobic acrylate sealant. R.L.Rosenberg 127
Bounds of the 2-input describing function. U.M.Rao and D.P.Atherton 273
Broadband (7-18 GHz) 10 dB overlay coupler for m.i.c. application. B.Sheleg and B.E.Spielman 175
Broadband balun, new. H.Bex 47
Broadband cylindrical antenna with continuous resistive and concentrated capacitive loadings. B.D.Popović, M.B.Dragovic and D.J.Paunovic 611
Broadband lumped-element X band GaAs f.e.t. amplifier. R.S.Pengelly 58
Buffered stack memory organisation. V.Rajaraman and O.Vikas 305

C

C.C.D. and s.a.w. devices, radar doppler processing using. J.B.G.Roberts 525
C.C.D.s, bonding and interconnection for. K.A.Jaggers 161
C.C.F.E.T.: An active charge-coupled device. K.Board, J.M.Shannon and A.Gill 452
C/V curves for gate-controlled diodes in silicon on sapphire. D.Kranzer and J.D.Gassaway 50
Cables, multiwire, crosstalkless termination of W.Van Etten 505
Calculation of radiation patterns of a Yagi antenna above imperfectly conducting ground (Computer-Program Description). P.S.Hall, B.Chambers and P.A.McInnes (Computer-program description) 550
Calculation of the far-field halfpower width and mirror reflection coefficients of double-heterostructure lasers. P.J.De Waard 11
Calculation of the radiation pattern, gain and input impedance of a Yagi antenna. P.S.Hall, B.Chambers and P.A.McInnes (Computer-program description) 282
Calibration equations, rigorous derivation of computer-corrected network-analyser. D.Woods 403
Capacitance changes, differential, new method of continuously measuring. B.Z.Kaplan, Y.Sagy and D.M.Jacobson 333
Capacitance measurements, low-frequency. L.Muzii, A.Picciali and S.Ravarino 487
Capacitance of nonuniform coaxial transmission lines. R.T.Irish 463
Caracterisation des noyaux de Volterra d'un systeme non lineaire (Characterisation of the Volterra kernels of a nonlinear system). M.Gautier, M.Monsion and J.P.Sagaspe 351
Carbon-fibre composite reflector antenna, gain-loss measurements on a. K.M.Keen 234 Errata 396
Carrier recovery technique for digital phase-modulated signals. J.D.H.Alexander 535
Cavity, plane equiangular 4-arm spiral antenna with conical reflector and, fitted into a structure. G.Grekou and G.Dubost 169
Cellular arrays of r.o.m.s, iterative digital multiplier based on. T.J.Chung and S.D.Bedrosian 426
Characterisation of threshold functions under the Walsh transform and linear translation. C.R.Edwards 563
Characteristics of magnetostatic-surface-wave propagation in a layered structure consisting of metals, dielectrics, a semiconductor and y.i.g.. N.S.Chang, S.Yamada and Y.Matsuo 83
Charge-coupled device, an active: c.c.f.e.t.. K.Board, J.M.Shannon and A.Gill 452
Charge-coupled-device digital-analogue convertor N.Weste, J.Mavor and D.J.MacLennan 551
Charge-coupled devices, 3-phase, logic drive circuit for. C.H.Sequin 371
Charge-coupled devices, novel technique for linearisation of. D.J.MacLennan and J.Mavor 222 Errata 312
Charge-limited domains in gallium-arsenide avalanche diodes. B.Culshaw, P.A.Blakey and R.A.Giblin 102
Charge-transfer devices, phase errors in transversal and recursive filters realised with. A.Chowaniec and G.S.Hobson 467
Choice of grid configuration of array antennas. B.N.Das and J.S.Rao 170
Chopping operations in wave digital filters. M.J.J.C.Annegarn 378
Circuit model for the GaAs m.e.s.f.e.t. valid to 12 GHz. G.C.Vendelin and M.Omori 60
Circuit to compute $(x^2 + y^2)^{1/2}$ for analogue values represented by pulse width. H.Ikeda 536
Circular aperture distribution with one parameter. R.C.Hansen 184
Circular waveguide, new millimetre-wave isolator containing a semiconductor rod in a. M.Kanda and W.G.May 261
Clock averaging circuit. N.W.McLeod and J.Wise 428
Clock recovery from random binary signals. J.D.H.Alexander 541
Clocking system, fault-tolerant digital. J.Moreira de Souza and E.Peixoto Paz 433
Cloud and rain, attenuation by, on earth-sun paths at 12 to 71 GHz. P.G.Davies 547
Coaxial junction with 3-ports as a variable 2-port S parameter standard at microwave frequencies. D.Woods 06
Coaxial junction with 3-ports as a variable 2-port s parameter standard at microwave frequencies. D.Woods 6 Errata 92
Code format conversion, digital filters for. D.J.Goodman 89
Codes, efficient ternary transmission. R.J.Catchpole 482
Codes for digital line transmission. K.W.Cattermole 548
Codes, self-orthogonal convolutional, optical Barker sequences and. P.S.Moharir 124
Codes, some BCH, are optimum. D.A.Bell and R.Laxton 296
Coding, efficient run-length, of graphics, irrele-

vant shifts of black-white transitions for. V.Margner and P.Zamperoni 628
Coding method, run-length, for black-and-white facsimile with a ternary code as an intermediate step. U.Rothgordt 101
Comment on improved describing function for hysteresis. D.P.Atherton 256
Comment on linear-system reduction by continued-fraction expansion about a general point. R.Parthasarathy and H.Singh 193
Common-gate GaAs f.e.t. oscillator. M.Omori and C.Nishimoto 369
Comparison of boron and neon damage effects in boron ion-implanted resistors. B.A.MacIver 484
Comparison of noise-measured and theoretical value of base spreading resistance for an interdigital transistor. K.F.Knott and R.T.Unwin 147
Comparison of numerical-solution methods for 2-dimensional bipolar-transistor-analysis algorithm. C.R.Jesshope, E.J.Zaluska and H.Kemhadjian 285
Compatible 2-channel encoding of surround sound. M.A.Gerzon 615
Compensation of multivariable 1st-order-type systems. D.H.Owens 511
Complementary Josephson-junction circuit: a fast flip-flop and logic gate. W.Baechtold, Th.Forster, W.Heuberger and Th.O.Mohr 203
Complete description of the basic amplifier configuration by feedback action. M.Drosg 69
Complex distribution effects of thin component ohmic-contact layers on GaAs. B.L.Weiss and H.L.Hartnagel 263 Errata 396
Composite feed, crosspolarisation measurements using a. S.I.Ghobrial, A.Rahim Obeid and Fadia Nakhla 85
Compressor, s.a.w. fused-silica reflective-array. C.Lardat 46
Computation of the scattering matrix of a class of reciprocal lossless 2-ports from one short-circuit measurement. G.Barbarino, S.Ridella and U.Candito 626
Computer-aided experimental investigation of the correct turn-on in thyristors with amplifying gate. A.Siiard and V.Marinescu 419
Computer algorithm for optimal control of linear systems with assigned eigenvalues. S.Elangovan, G.Srinivasan and N.D.Rao 361
Computers, digital stochastic, moving-average output interface for. V.C.V.Pratapa Reddy 166
Computing the zeros of systems. K.J.Khatwani and J.S.Bajwa 631
Consecutive reduction of 2-dimensional redundancy. P.K.S.Wah 504
Contact-bonded epoxy-resin lenses to fibre end-faces. J.Wittiman 477
Control, low-sensitivity, of nuclear reactors. M.M.Elmetwally and N.D.Rao 269
Control structure, directed-graph, simplified method for establishing determinancy in a. F.G.Heath and D.Bain 16
Controllers, programmable sequence, generalised model for. M.L.Rahman and M.E.Woodward 86
Conversion, r.m.s.-d.c., novel techniques for, based on the difference of squares. B Gilbert 181
Convertor networks, ideal 2-port, using operational amplifiers. J.Glover 94
Convolution and correlation using light diffraction from bulk acoustic waves. J.M.Rouvaen, E.Bridoux, R.Torguet and C.Carles 281
Correlation of long sequences by a surface-acoustic-wave convolver with application to spread-spectrum communication. D.P.Morgan and J.M.Hannah 193
Correlator, high-dynamic-range bulk-elastic wave. E.Bridoux, J.M.Rouvaen, F.Haine and R.Torguet 26
Counter, lightning-flash, using pattern recognition to discriminate between ground and cloud flashes. D.Mackerras and T.L.Tillett 350
Counterexample in the least-squares inverse stabilisation of 2D recursive filters. Y.Genin and Y.Kamp 330
Coupled bandpass filter, parallel-, effect of difference in odd- and even-mode wavelengths on a. D.Kajfez and S.Govind 117
Coupled-resonator acoustic-surface-wave filter. M.Redwood, R.B.Topolevsky, R.F.Mitchell and J.S.Palfreeman 253 Errata 568
Coupler, broadband (7-18 GHz) 10 dB overlay, for m.i.c. application. B.Sheleg and B.E.Spielman 175
Coupling efficiency of the tapered coupler. R.B.Smith 204
Coupling factor for 0° asymmetric nonuniform line couplers. J.P.Villotte and Y.Garault 208
Criterion for the stability of all moments of a particular stochastic system. J.L.Willems and D.Aeyels 272 Errata 396
Crosscorrelation function, single-bit, of single-bit bandlimited Gaussian waveform and two simultaneous reflections corrupted by noise. J.E.Howard 113
Crosspolar radiation from open-ended corrugated waveguides. C.G.Parini, P.J.B.Clarricoats and A.D.Olver 567
Crosspolarisation measurements using a composite feed. S.I.Ghobrial, A.Rahim Obeid and Fadia Nakhla 85
Crosspolarisation measurements using a composite feed with parasitic elements. S.I.Ghobrial and M.M.Futuh 480
Crosstalkless termination of multiwire cables. W.Van Etten 505
Crystal filters, bridged, equivalent network for. Man Shek Lee Errata 136
Crystal-resonator frequencies, two, wide-range temperature compensation by addition of: practical results with quartz and $LiTaO_3$. J.Brunner 304
Current computation on complex structures by finite-element method. A.Sankar and T.C.Tong 481
Cutoff wavelengths of guided modes in optical fibres with square-law core profile. C.G.Someda and M.Zoboli 602

D

D* functions generator. I.Neto and K.R.Dimond 461
Data channels, logicfree. D.Zissos Errata 52
Data transmission, party-line digital, signal encoding for. B.G.Taylor 454
Date networks with random channel errors, optimum packet size for. A.A.Shamim and J.C.Majithia 149
Delay line, acoustic-surface-wave disc, optics of propagation in the anisotropic space of an. I.M.Mason, E.Papadofrangakis, J.Chambers and R.Ulrich 348
Delay line, y-cut quartz disc, thermal characteristics of surface-wave recirculating loops on a. J.Chambers, E.Papadofrangakis and I.M.Mason 36
Delay structures with planar Gunn devices. K.Mause 408
Delay, time-, control systems, partial input-output decoupling in. S.G.Tzafestas and T.G.Pimenides 586
Delta modulation, high-information, measured signal/quantising-distortion ratio of. L.D.J.Eggermont 242
Delta-modulation systems, instantaneously companded, upper bound for signal/noise ratio for. R.Steele and S.D.Cridge 145 Errata 248
Dependence of t.e.o. efficiency on NL product. K.T.Ip and L.F.Eastman 301
Depletion m.o.s. power transistors. B.Farzan and C.A.T.Salama 565
Descent algorithm for the optimisation of bilinear systems. D.H.Owens 335
Describing function, 2-input, bounds of the. U.M.Rao and D.P.Atherton 273
Describing function for hysteresis, improved. P.Atkinson and P.J.Thomas 141
Design considerations for a receiver for digital fibre-optic communication systems. F.Lombardi and G.Orlandi 439
Design of cavity-stabilised microwave oscillators. R.Knochel and K.Schunemann 405
Design of coupled combline directional couplers. D.J.Gunton 607
Design of digital controllers for multivariable stochastic systems. S.I.Ahson and H.Nicholson 122
Design of moving-target-indicator filters using a quadrature channel. R.Bennett and A.G.J.Holt 594
Design of multivariable control systems using reduced-order models. S.K.Woon and S.A.Marshall 341
Design of multivariable systems using unity-rank state feedback: further results. H.Seraji 34
Design-parameter evaluation for a class of preset z.f.e.s. G.Prati, F.Russo and L.Verrazzani 280
Design procedures for a printed-circuit-board transmission-line transformer. J.W.Chamberlayne 609
Design techniques for stable model reference adaptive control systems. A.J.Udink ten Cate 347
Detection and partial correction of isolated errors from the received data in a 1st-order d.p.c.m. codec. R.Steele and M.A.Yeoman 230
Determinacy of computation schemata for both parallel and simultaneous operation. B.V.Howard 485
Determinancy in a directed-graph control structure, simplified method for establishing. F.G.Heath and D.Bain 16
Dielectric resonator, frequency-stabilised coaxial, quick accurate design of a. P.Guillon, P.Choteau, J.Citerne and L.Raczy 570
Differential equations, coupled, evaluation in approximations of, in multimode transmission. L.A.R.Denger 266
Diffraction solution, uniform, for a discontinuity in curvature. G.L.James, G.Tong and D.A.Ross 557
Digital-analogue convertor, charge-coupled-device. N.Weste, J.Mavor and D.J.MacLennan 551
Digital bandpass filters, new squared-magnitude function for. S.N.Hazra 315
Digital controllers for multivariable stochastic systems, design of. S.I.Ahson and H.Nicholson 122
Digital fibre-optic communication systems, design considerations for a receiver for. F.Lombardi and G.Orlandi 439
Digital filter roundoff noise calculation using the driving-point impedance. R.Yarlagadda and K.E.Massad 360
Digital filters for code format conversion. D.J.Goodman 89
Digital filters, mildly suboptimal, using a host windowing approach. G.D.Cain and A.H.Abed 493
Digital filters, wave, chopping operations in. M.J.J.C.Annegarn 378
Digital interpolation filters with prescribed interpolation errors. J.Hagenauer 368
Digital line transmission, codes for. K.W.Cattermole 548
Digital-phase-locked-loop phase-error variance. A.J.Ruddell and A.M.Rosie 399
Digital simulation of electronic components. D.N.Pim and J.M.Bullingham 411
Digital stochastic computers, optimum criteria for output interfaces in. A.J.Miller, A.W.Brown and P.Mars 326
Digital xy position indicator using Walsh functions. J.Gordon 05
Diode impedance BARITT-, pulsed measurement of, against current and temperature. Th.G.van de Roer and J.J.M.Kwaspen 165
Diodes, efficient microwave p^+-n-p^+ BARITT. J.Freyer and W.Harth 140
Diodes, high-speed high-power 1.06 μm gallium-indium-arsenide light-emitting A.W.Mabbitt and C.D.Mobsby 157
Diodes, low-duty short-pulsed high-power TRAPATT, transient thermal analysis of. H.C.Bowers and C.O.G.Obah 380
Dipole, transistor-fed thick folded, with large bandwidth at reception. J.P.Daniel, G.Dubost and J.Rospars 90
Direct coupling from a GaAs laser into a single-mode fibre. R.B.Dyott 308
Direct modulation of D.H. GaAlAs lasers with GaAs m.e.s.f.e.t.s. V.Ostoich, P.Jeppesen and N.Slaymaker 515
Direct observation of the depletion layer in a multichannel vertical j.f.e.t. (m.j.f.e.t.). H.Ogawa, A.Abe, T.Nakajima and T.Kajiwara 223
Directional coupler for gigahertz frequencies, based on the coupling properties of two planar comb transmission lines. D.J.Gunton and E.G.S.Paige 406
Directional couplers, coupled combline, design of. D.J.Gunton 607
Discontinuities in waveguides, use of edge condition in modal analysis of some. C.Vassallo 67
Discrete signals, interpolation of. S.Koubanitsas 48
Discrete systems, multivariable, gradient identification of. A.J.Udink ten Cate 98
Dispersion characteristic of a microstrip line with a step discontinuity. S.Akhtarzad and P.B.Johns 310
Dispersion characteristics of microstrip lines on magnetic substrates using 3-dimensional resonators, t.l.m. analysis of the. S.Akhtarzad and P.B.Johns 130
Dispersion characteristics of the Gaussian surface-magnetostatic-wave modes in ferrite slabs. M.Bini, L.Millanta and N.Rubino 374
Dispersion in optical waveguides with graded refractive index. S.Geckeler 139
Dispersion, profile, in multimode fibres: measurement and analysis. D.Gloge, I.P.Kaminow and H.M.Presby 469
Dispersion, zero material, in optical fibres. D.N.Payne and W.A.Gambling 176
Distortion ratio, measured signal/quantising-, of high-information delta modulation. L.D.J.Eggermont 242
Distortion, residual, remaining after pre- or post-distortion. M.A.Gerzon 601
Distortionless frequency-shift keying: further results. M.J.O'Mahony and K.W.Cattermole 605
Disturbance localisation in linear time-invariant multivariable systems. S.L.Shah, D.G.Fisher and D.E.Seborg Errata 156
Disturbance-rejection characteristics of linear discrete-time systems incorporating integral feedback. B.Porter and A.Bradshaw 27
Diversity system for u.h.f. mobile radio, evaluation of a. M.Henze and J.D.Parsons 498
Domain width in a dielectrically loaded Gunn diode. R.E.Lee 569
Doublet replie actif a large bande a la reception (Transistor-fed thick folded dipole with large bandwidth at reception). J.P.Daniel, G.Dubost and J.Rospars 90
Dual-frequency-band feed with partially-dielectric-loaded grooves. V.J.Vokurka 376
Dyadic approximation about a general frequency point. D.H.Owens 331
Dynamic behaviour of semiconductor lasers. P.W.Boers, M.T.Vlaardingerbroek and M.Danielsen 206

E

Effect of chromium thickness on AuCr-nSi Schottky and AuCr-n-p$^+$ Si BARITT diodes. J.Narain, J.M.Borrego and R.J.Gutmann 178
Effect of conductive thermal-control paint on space-craft-antenna performance. K.M.Keen 412
Effect of dielectric edge condition on mode-matching solutions. G.H.Brooke and W.K.McRitchie 422
Effect of difference in odd- and even-mode wavelengths on a parallel-coupled bandpass filter. D.Kajfez and S.Govind 117
Effect of dual implants into GaAs. T.Ambridge, R.Heckingbottom, E.C.Bell, Sealy. B.J., K.G.Stephens and R.K.Surridge 314
Effect of mirror resistivity on loss-angle measurements in open resonators. R.G.Jones 545
Effect of polarisation on pulse broadening in multimode graded-index optical fibres. J.A.Arnaud 554
Effect of temperature on the transient response of twisted nematic liquid-crystal films. H.A.Tarry 339
Effects of shape and orientation of spheroidal raindrops on microwave scattering. C.Warner 328
Efficient damping method for least-squares algorithms. R.E.Massara and J.K.Fidler 33
Efficient microwave p$^+$-n-p$^+$ BARITT diodes. J.Freyer and W.Harth 140
Efficient ternary transmission codes. R.J.Catchpole 482
Efficient variable-metric method for obtaining estimates of the parameters of a dynamic model. S.L.Stott and L.James 311
Eigenvalue assignment by reduced-order models. J.Hickin and N.K.Sinha 318
Eigenvalue/eigenvector assignment for multivariable systems. S.Srinathkumar and R.P.Rhoten 124
Eigenvalue/eigenvector assignment for multivariable systems and further results for output feedback control. S.L.Shah, D.G.Fisher and D.E.Seborg 388
Electrical and optical properties of Ge_n-SnO_2 photodetectors. J.C.Manifacier, S.Gaillard and J.P.Fillard 241
Electrically cascaded surface-acoustic-wave resonator filters. P.S.Cross, R.S.Smith and W.H.Haydl 244
Electrically tunable narrowband optical filter. H.A.Tarry 471
Electro-optic technique for adding binary numbers. H.F.Taylor 313
Electro-optic thin films of zinc sulphide. P.L.Jones and K.A.H.Al-Khateeb 262
Electrochromism in hydrated tungsten-oxide films. R.Hurditch 142
Electrodes, with inclined apodisation, acoustic surface-wave filters without apodisation loss with. K.Hohkawa, F.Ishihara and S.Yoshikawa 259
Electroluminescent diodes, high-speed n-AlGaAs-p-GaAs. J.Heinen and W.Harth 512
Electroluminescent GaAs-$Ga_xAl_{1-x}As$ heterostructure diodes with negative resistance at low temperatures. H.Beneking and A.Gattung 37
Electron optical system for microfabrication with 10 000 lines per field. G.A.C.Jones, H.Ahmed and W.C.Nixon 214
Elimination of skewing in the amplitude distributions of long m sequences subjected to low-pass filtering. G.H.Tomlinson and P.Galvin 77
Encapsulation of ion-implanted GaAs using native oxides. B.J.Sealy and A.D.E.d'Cruz 323
Encoding, compatible 2-channel, of surround sound. M.A.Gerzon 615
Encoding, signal, for party-line digital data transmission. B.G.Taylor 454
Encoding standards for 2-channel surround sound. P.B.Fellgett and M.A.Gerzon 518 Errata 608
End launching of, and emission from, leaky modes in graded fibres. W.J.Stewart 516
Epitaxial InP, liquid-phase-, surface morphology of. S.Guha, A.Majerfield, N.Moyes and P.N.Robson 303
Epitaxy, vapour-phase, GaAs double-drift avalanche diode from. W.Tantraporn and S.P.Yu 196
Equal-areas rule for gallium-arsenide avalanche diodes. J.E.Carroll, B.Culshaw and R.A.Giblin 316
Equivalent circuit of coaxial (APC-7)-to-microstrip transition. V.Buontempo 220
Equivalent-circuit parameters for $LiTaO_3$ plate resonators. J.W.Burgess, M.C.Hales and R.J.Porter 449
Equivalent circuit, small-signal, for IMPATT transistors. A.Nguyen Quang 503
Equivalent network for bridged crystal filters. Man Shek Lee Errata 136
Errors, isolated, detection and partial correction of, from the received data in a 1st-order d.p.c.m. codec. R.Steele and M.A.Yeoman 230
Errors, random channel, optimum packet size for data networks with. A.A.Shamim and J.C.Majithia 149
Evaluation in approximations of coupled differential equations in multimode transmission. L.A.R.Denger 266
Evaluation of a diversity system for u.h.f. mobile radio. M.Henze and J.D.Parsons 498
Evanescent and complex solutions in two circular coaxial waveguides. I.I.Rabinowitz 415
Experimental results on fast surface states and 1/f noise in m.o.s. transistors. G.Broux, R.Van Overstraeten and G.Declerck 97
Experiments on integrated gallium-arsenide f.e.t. oscillators at X band. R.A.Pucel, R.Bera and D.Masse 219
Expression for decoupling in multiple-beam antennas. L.Lewin 420
Extended-duration sweeps, sawtooth-voltage-waveform generator for. B.L.Hart 64
Extended-dynamic-range measurements on transmitter noise and intermodulation. H.T.Al Hafid and J.G.Gardiner 636
Extension of applicability of Popov's steady-state absolute-stability frequency criterion of nonlinear systems. Gh.Pilat Cartianu,Fl. 111
Extrapolation and interpolation in nonuniform sampling sequences with average sampling rates below the Nyquist rate. T.T.Fjallbrant 264
Extremely high packaging densities by operating integrated circuits with r.f. power. G.Krause 327

F

F.E.T. 11 GHz oscillator, alumina microstrip GaAs. N.A.Slaymaker and J.A.Turner 300
F.E.T. amplifier, broadband lumped-element X band GaAs. R.S.Pengelly 58
F.E.T. amplifier, tunable X band GaAs. R.A.Soares and J.A.Turner 474
F.E.T. mixer performance at X band, integrated GaAs. R.A.Pucel, D.Masse and R.Bera 199
F.E.T. oscillator, common-gate GaAs. M.Omori and C.Nishimoto 369
F.E.T. oscillators, integrated gallium-arsenide, at X band, experiments on. R.A.Pucel, R.Bera and D.Masse 219
F.E.T. preamplifier, v.h.f., with 0.3 dB noise figure. D.I.Hoult and R.E.Richards 596
Fabrication of 3-terminal transferred-electron logic devices by proton bombardment for device isolation. L.C.Upadhyayula, S.Y.Narayan and E.C.Douglas 201
Facsimile, black-and-white, with a ternary code as an intermediate step, run-length coding method for. U.Rothgordt 101
Fade depth for rainfall, semiempirical law relating crosspolarisation discrimination to. P.A.Watson and M.Arbabi 42
Fast and nondestructive method of C(V) profiling of thin semiconductor layers on an insulating substrate. M.Binet 580
Fast Fourier transform, pseudonoise test signals and the. P.E.Wellstead 202
Fast photoluminescence modulation for optoelectronic applications. U.Langman 490
Fault-tolerant digital clocking system. J.Moreira de Souza and E.Peixoto Paz 433
Fe-doped InP, semi-insulating properties of. Osamu Mizuno and Hisao Watanabe 118
Feedback action, complete description of the basic amplifier configurations by. M.Drosg 69
Feedback, integral, disturbance-rejection characteristics of linear discrete-time systems incorporating. B.Porter and A.Bradshaw 27
Feedback, unity-rank state, design of multivariable systems using: further results. H.Seraji 34
Fermat-transform implementation by a minicomputer. P.Melhuish 109
Ferrite bias lines for use with GaAs IMPATT diodes. P.W.Braddock and R.D.Hodges 57
Ferrite cylinder, latching, helical line with. K.P.Ivanov and K.G.Kostov 128
Ferrite slabs, dispersion characteristics of the Gaussian surface-magnetostatic-wave modes in. M.Bini, L.Millanta and N.Rubino 374
Fibre endfaces, contact-bonded epoxy-resin lenses to. J.Wittiman 477
Fibre-optic communication systems, digital, design considerations for a receiver for. F.Lombardi and G.Orlandi 439
Fibre, silicone-clad fused-silica-core. S.Tanaka, K.Inada, T.Akimoto and M.Kozima 153
Fibre, single-mode, direct coupling from a GaAs laser into a. R.B.Dyott 308
Fibre systems, multimode-, influence of mode coupling on the noise properties of. G.Zeidler and D.Schicketanz 307
Fibres, circular, optical coupling between thin films and. P.J.R.Laybourn, C.A.Millar, G.Stewart and C.D.W.Wilkinson 02
Fibres, graded-core, illumination of. C.G.Someda and M.Zoboli 577
Fibres, graded, end launching of, and emission from, leaky modes in. W.J.Stewart 516
Fibres, graded-index, 100 Mb/s optical-repeater experiment employing. K.Nawata, K.Takano, T.Ikegami and S.Ohara 583
Fibres, graded-index cylindrical, ray-tracing technique for evaluating the dispersion characteristics of. P.F.Checcacci, R.Falciai and A.M.Scheggi 633
Fibres, multimode graded-index, pulse broadening in. J.A.Arnaud 08
Field-effect transistor, GaAs Schottky-gate, out-out-resistance properties of the, in saturation. P.Rossel and J.J.Cabot 150
Field-effect transistors, medium-power GaAs. I.Drukier, R.L.Camisa, S.T.Jolly, H.C.Huang and S.Y.Narayan 104
Field effect transistors, multistable circuit using complementary. M.M.Abu-Zeid and C.Kerssen 613
Films, thin, and circular fibres, optical coupling between. P.J.R.Laybourn, C.A.Millar, G.Stewart and C.D.W.Wilkinson 02
Filter, acoustic-surface-wave, investigation of intermodulation in. G.Coussot 116
Filter, band-elimination, employing surface-acoustic-wave resonators. Y.Koyamada, F.Ishihara and S.Yoshikawa 108 Errata 312
Filter, coupled-resonator acoustic-surface-wave. M.Redwood, R.B.Topolevsky, R.F.Mitchell and J.S.Palfreeman 253 Errata 568
Filter, grating-, transformation chart. A.Haus 553
Filtered binary sequences with no skewing. K.R.Godfrey 456
Filtering, low-pass, elimination of skewing in the amplitude distribution of long m sequences subjected to. G.H.Tomlinson and P.Galvin 77
Filters, 2D recursive, counterexample in the least-squares inverse stabilisation of. Y.Genin and Y.Kamp 330
Filters, acoustic surface-wave, without apodisation loss with electrodes with inclined apodisation. K.Hohkawa, F.Ishihara and S.Yoshikawa 259
Filters, band branching, novel approach to the production of, for microwave frequencies. D.E.N.Davies, A.Y.Niazi and D.Lamensdorf 10
Filters, monotonic lowpass, with maximum selectivity. B.M.Djurich 82
Filters, moving-target-indicator, design of, using a quadrature channel. R.Bennett and A.G.J.Holt 594
Filters, surface-acoustic-wave resonator, fine tuning of, with metallisation thickness. W.H.Haydl and P.S.Cross 252
Filters, transversal and recursive, realised with charge-transfer devices, phase errors in. A.Chowaniec and G.S.Hobson 467
Fine tuning of surface-acoustic-wave resonator filters with metallisation thickness. W.H.Haydl and P.S.Cross 252
Finite-element method, current computation on complex structures by. A.Sankar and T.C.Tong 481
Flowmeter, ultrasonic blood, yielding instantaneous velocity profile by real-time phase detection. M.Brandestini 183
Fokker-Planck techniques, phase-lock-loop statistics without recourse to. J.H.Roberts 267
Formation of synthetic images on a laser-beam-addressed smectic liquid-crystal display. M.Hareng and S.Le Berre 73
Fourier-transform processor, surface-acoustic-wave discrete, network analyser employing. P.M.Grant, M.A.Jack and J.H.Collins 468
Frequency, b.j.t., doubling with sinusoidal output. R.W.J.Barker 106
Frequency-dependent behaviour of microstrip offset junctions. G.Kompa 537
Frequency-domain stability theorem for the Lurie system with multiple nonlinearities specified by sector and slope information. P.C.Byrne 394
Frequency measurement, rapid-response, using analogue period processing. D.C.Cooper and J.M.Kelly 383
Frequency-shift keying, distortionless: further results. M.J.O'Mahony and K.W.Cattermole 605
Further explanation of the continuous transformation pattern on the AD-BC plane. J.Glover 75

G

GaAs, complex distribution effects of thin component ohmic-contact layers on. B.L.Weiss and H.L.Hartnagel 263 Errata 396
GaAs double-drift avalanche diode from vapour-phase epitaxy. W.Tantraporn and S.P.Yu 196
GaAs, effect of dual implants into. T.Ambridge, R.Heckingbottom, E.C.Bell, B.J.Sealy, K.G.Stephens and R.K.Surridge 314
GaAs, ion-implanted, encapsulation of, using native oxides. B.J.Sealy and A.D.E.d'Cruz 323
GaAs l.e.d.s., pseudorandom 250 Mb/s modulation of. R.W.Dawson 144
GaAs m.e.s.f.e.t. linear power-amplifier stage giving 1W. R.L.Camisa, J.Goel and I.Drukier 572
GaAs, n- and p-type epitaxial, majority-carrier traps in. F.Hasegawa and A.Majerfield 286

GaAs, n, temperature dependence of the high-field velocity of electrons in. P.A.Houston and A.G.R.Evans 210
GaAs planar Gunn digital devices by sulphur-ion implantation. T.Mizutani and K.Kurumada 638
GaAs varactor diode for u.h.f. t.v. tuners. Ikuo Niikura and Tohru Hara 391
Gain adjusting an optimal regulator. S.Mukhopadhyay 277 Errata 396
Gain-loss measurements on a carbon-fibre composite reflector antenna. K.M.Keen 234 Errata 396
Gate-controlled diodes in silicon on sapphire, C/V curves for. D.Kranzer and J.D.Gassaway 50
Ge_x-SnO_2 photodetectors, electrical and optical properties of. J.C.Manifacier, S.Gaillard and J.P.Fillard 241
General excitation table for a JK multistable. J.I.Acha and J.L.Huertas 624
Generalisation of nodal analysis. P.F.Ridler 416
Generalisation of the self-tuning regulator. D.W.Clarke and P.J.Gawthrop 40
Generalised model for programmable sequence controllers. M.L.Rahman and M.E.Woodward 86
Generation of Gaussian signals from summed m-sequences. G.H.Tomlinson and P.Galvin 521
Gradient identification of multivariable discrete systems. A.J.Udink ten Cate 98
Grating-filter transformation chart. A.Haus 553
Gunn devices, delay structures with planar. K.Mause 408
Gunn digital devices, GaAs planar, by sulphur-ion implantation. T.Mizutani and K.Kurumada 638
Gunn diode, dielectrically loaded, domain width in a. R.E.Lee 569
Gunn-diode oscillator at 95 GHz. T.G.Ruttan 193
Gunn-effect diodes, K_a band GaAs, ion-implanted n^+ contacts for. D.H.Lee, J.J.Berenz and R.L.Bernick 189
Gunn-effect logic device, planar, with two separated cathodes. M.Masuda, M.Nishida, M.Kimura and J.Koyama 320 Errata 568
Gunn reflection amplification, wideband GaAs, for the 18-26.5 GHz waveguide band. J.G.de Koning, R.E.Goldwasser, R.J.Hamilton,Jun. and F.E.Rosztoczy 195 Errata 312
Gyrator circuit, jump phenomenon in a. G.Dinias and T.Delyannis 560
Gyrator frequency modulator. F.S.Atiya and M.H.Keriakos 226 Errata 475

H

Harmonic, 2nd-, extraction, simple TRAPATT circuit for. C.D.Corbey 283 Errata 396
Helical line with latching ferrite cylinder. K.P.Ivanov and K.G.Kostov 128
Heterostructure diodes, electroluminescent GaAs-$Ga_xAl_{1-x}As$, with negative resistance at low temperatures. H.Beneking and A.Gattung 37
High-dynamic-range bulk-elastic-wave correlator. E.Bridoux, J.M.Rouvaen, F.Haine and R.Torguet 26
High-efficiency GaAs m.e.s.f.e.t. amplifiers. H.C.Huang, I.Drukier, R.L.Camisa, S.Y.Narayan and S.T.Jolly 508
High-efficiency p-n junction GaAs IMPATT devices. F.E.Rosztoczy, S.I.Long, R.E.Goldwasser and J.Kinoshita 179
High-efficiency TRAPATT operation in X band. J.J.Purcell, M.R.Weatherhead, S.M.R.Gordon, C.H.Oxley and P.R.Wickens 236
High-field velocity of electrons in n GaAs, temperature dependence of the. P.A.Houston and A.G.R.Evans 210
High-power C band Read IMPATT diodes. M.G.Alderstein, R.N.Wallace and S.R.Steele 430
High-radiance small-area gallium-indium-arsenide 1.06 μm light-emitting diodes. A.W.Mabbitt and R.C.Goodfellow 274
High-speed 1 μm GaAs m.e.s.f.e.t.. E.Kohn, R.Wuller, R.Stahlmann and H.Beneking 171
High-speed high-power 1.06 μm gallium-indium-arsenide light-emitting diodes. A.W.Mabbitt and C.D.Mobsby 157
High-speed m sequence generation: a further note. J.R.Ball, A.H.Spittle and H.T.Liu 107
High-speed n-AlGaAs-p-GaAs electroluminescent diodes. J.Heinen and W.Harth 512
Holography, surface-wave, background subtraction in. A.E.Ash and H.K.Wickramasinghe 526
Horn, corrugated conical, radiation pattern of a, in terms of Laguerre-Gaussian functions. C.Aubry and D.Bitter 154
Horns, very wideband corrugated. Z.Frank 131
Huffman sequences, multilevel aperiodic. P.S.Moharir 56
Hybrid circuit, novel active, and its applications. S.B.Park 362
Hybrid parametric amplifier. C.S.Aitchison and A.S.Wong 338
Hysteresis, improved describing function for. P.Atkinson and P.J.Thomas 141

I

I.I.L., load-line analysis of. M.I.Elmasry and R.D.Midha 68
Ideal 2-port convertor networks using operational amplifiers. J.Glover 94
Ideal 2-port invertor networks using operational amplifiers. J.Glover 137
Ideal ohmic contacts to InP. H.T.Mills and H.L.Hartnagel 621
Identification of automata, approximate. B.R.Gaines 444
Identity-transponder system using c.w. interrogation. C.D.McEwen 642
Illumination of graded-core fibres. C.G.Someda and M.Zoboli 577
Image conversion, real-time acousto-optical. B.Dalannoy, G.Thomin and M.Moriamez 334
IMPATT amplifiers and oscillators, elimination of the low-frequency spurious oscillations in. M.G.Reggiani and F.E.Marchetti 539
IMPATT devices, high-efficiency p-n junction GaAs. F.E.Rosztoczy, S.I.Long, R.E.Goldwasser and J.Kinoshita 179
IMPATT-diode oscillators, investigation of parasitic oscillations in, by a simple locus chart. J.J.Goedbloed 54
IMPATT diodes, bias-tuned double-drift, for wide-bandwidth operation. R.S.Ying and D.H.Lee 345
IMPATT diodes, GaAs, ferrite bias lines for use with. P.W.Braddock and R.D.Hodges 57
IMPATT diodes, high-low GaAs, observation of a peak in the negative-resistance/r.f.-voltage curve for. B.Kramer and C.Balzano 509
IMPATT diodes, high-power C band Read. M.G.Alderstein, R.N.Wallace and S.R.Steele 430
IMPATT diodes, mass-production-type GaAs, in s.h.f. band. M.Miyazaki and M.Migitaka 437
IMPATT diodes, millimetre-wave, noise-factor measurement of, by the superregenerative principle. J.Stevance and G.Cachier 591
IMPATT oscillators, spurious oscillations in. G.S.Hobson and R.C.Tozer 291
IMPATT transistors, small-signal equivalent circuit for. A.Nguyen Quang 503
Impedance, BARITT-diode, pulsed measurement of, against current and temperature. Th.G.van de Roer and J.J.M.Kwaspen 165
Impedance, input, of a Yagi antenna, calculation of the radiation pattern, gain and. P.S.Hall, B.Chambers and P.A.McInnes (Computer-program description) 282
Improved algorithm for optimal stabilisation of linear systems. A.C.Pugh and A.K.Shelton 528
Improved describing function for hysteresis. P.Atkinson and P.J.Thomas 141
Improved describing function for hysteresis, comment on. D.P.Atherton 256
Improved method of anodic oxidation of GaAs. H.Hasegawa, K.E.Forward and H.Hartnagel 53
Improvements for general-purpose s.s.i. logic packages and m.s.i./l.s.i. logic subsystems. S.L.Hurst 78
Improvements in the beam-wave theory of the open resonator. A.L.Cullen 344
Impulse response of a self-focusing optical fibre. S.Nemoto and G.L.Yip 191
Independent control of temperature coefficient and breakdown voltage in Zener diodes. B.Culshaw 499
Indicator, digital xy positions, using Walsh functions. J.Gordon 05
Indirect model-matching technique for multicontroller systems. S.G.Tzafestas 353
Inductance, capacitance and effective relative permittivity of microstrip line. E.A.Shapoval 225
Inductance, quartz-resonator. J.W.Burgess and A.J.L.Muir 502
Inductors, foil, self resonance in. R.J.Kemp, P.N.Murgatroyd and N.J.Walker 337
Influence of active-layer width on the performance of homojunction and single-heterojunction GaAs light-emitting diodes. W.Harth, J.Heinen and W.Huber 23
Influence of mode coupling on the noise properties of multimode-fibre systems. G.Zeidler and D.Schicketanz 307
Influence of the channel width on the threshold voltage modulation in m.o.s.f.e.t.s. K.O.Jeppson 297
InP, epitaxial, temperature dependence of the subthreshold velocity/field characteristic for. A.Majerfeld, K.E.Potter and P.N.Robson 81
InP microwave oscillators with 2-zone cathodes. K.W.Gray, J.E.Pattison, H.D.Rees, B.A.Prew, R.C.Clarke and L.D.Irving 402
InP, temperature dependence of the velocity/field characteristic of electrons in. W.Fawcett and G.Hill 80
InP transferred-electron devices, transit modes of. D.Jones and H.D.Rees 13
Insensitive controllers, numerical comparison of two methods of designing. C.S.Berger 489
Instabilities in some nematic products of positive dielectric anisotropy. B.Kerllenevich and A.Coche 421
Integrated circuits with r.f. power, extremely high packaging densities by operating. G.Krause 327
Integrated GaAs f.e.t. mixer performance at X band. R.A.Pucel, D.Masse and R.Bera 199
Interface, moving-average output, for digital stochastic computers. V.C.V.Pratapa Reddy 166
Interfaces, Au-GaAs outmigration of gallium from. C.J.Madams, D.V.Morgan and M.J.Howes 574
Intermodulation, investigation of, in acoustic-surface-wave filter. G.Coussot 116
Interpolation and extrapolation in nonuniform sampling sequences with average sampling rates below the Nyquist rate. T.T.Fjallbrant 264
Interpolation of discrete signals. S.Koubanitsas 48
Investigation of intermodulation in acoustic-surface-wave filter. G.Coussot 116
Investigation of parasitic oscillations in IMPATT-diode oscillators by a simple locus chart. J.J.Goedbloed 54
Ion implantation, low-resistivity n-type layers in $InAs_xP_{1-x}$ by. D.E.Davies, J.K.Kennedy and L.F.Lowe 462
Ion-implanted n^+ contacts for K_a band GaAs Gunn-effect diodes. D.H.Lee, J.J.Berenz and R.L.Bernick 189
Ion-implanted resistors, boron, comparison of boron and neon damage effects in. B.A.MacIver 484
Ion, sulphur, implantation, GaAs planar Gunn digital devices by. T.Mizutani and K.Kurumada 638
Irrelevant shifts of black-white transitions for efficient run-length coding of graphics. V.Margner and P.Zamperoni 628
Iterative digital multiplier based on cellular arrays of r.o.m.s. T.J.Chung and S.D.Bedrosian 426

J

J.F.E.T., diffused, V_{ds} voltage capabilities of a, with a vertical-channel arrangement. J.L.Morenza and D.Esteve 172
J.F.E.T. (m.j.f.e.t.), multichannel vertical, direct observation of the depletion layer in a. H.Ogawa, A.Abe, T.Nakajima and T.Kajiwara 223
Josephson-junction circuit, complementary: a fast flip-flop and logic gate. W.Baechtold, Th.Forster, W.Heuberger and Th.O.Mohr 203
Jump phenomenon in a gyrator circuit. G.Dinias and T.Delyannis 560

L

L'eliminazione delle oscillazioni spurie negli amplificatori e oscillatori a diodo impatt (Elimination of the low-frequency spurious oscillations in impatt amplifiers and oscillators). M.G.Reggiani and F.E.Marchetti 539
Large-angle beam deflector using liquid crystals. A.F.Fray and D.Jones 358
Large-bandwidth diode convolver using an exceptionally uniform silicon-on-sapphire diode array. T.M.Reeder and T.W.Grudowski 530
Large-microstrip-step-discontinuity model useful to 10 GHz. R.E.Neidert 478
Large-scale systems, aggregation matrices for a class of low-order models for. J.Hickin and N.K.Sinha 186
Large-signal p.c.m. behaviour of injection lasers with coherent irradiation into one of their oscillating modes. H.Hillbrand and P.Russer 372
Laser-beam-addressed smectic liquid-crystal display, formation of synthetic images on a. M.Hareng and S.Le Berre 73
Laser, GaAs, direct coupling from a, into a single-mode fibre. R.B.Dyott 308
Laser-probe analysis of field distribution within acoustic-surface-wave planar resonators. I.M.Mason, J.Chambers and P.E.Lagasse 288
Laser, pulsed-, application to sampling oscilloscope. R.A.Lawton and J.R.Andrews 138
Lasers, D.H. GaAlAs, with GaAs m.e.s.f.e.t.s, direct modulation of. V.Ostoich, P.Jeppesen and N.Slaymaker 515
Lasers, double-heterostructure, calculation of the far-field halfpower width and mirror reflection coefficients of. P.J.De Waard 11
Lasers, injection, parametric sideband amplification in. P.Russer, H.Hillbrand and W.Harth 87
Lasers, injection, with coherent irradiation into

one of their oscillating modes, large-signal p.c.m. behaviour of. H.Hillbrand and P.Russer 372
Leaky modes in graded fibres. W.J.Stewart 321
Leaky rays on optical fibres of arbitrary (circularly symmetric) index profiles. M.J.Adams, D.N.Payne and F.M.E.Sladen 238
Least-squares algorithms, efficient damping method for. R.E.Massara and J.K.Fidler 33
Lenses, contact-bonded epoxy-resin, to fibre endfaces. J.Wittiman 477
Light diffraction from bulk acoustic waves, convolution and correlation using. J.M.Rouvaen, E.Bridoux, R.Torguet and C.Carles 281
Light-emitting diodes, high-radiance small-area gallium-indium-arsenide 1.06 μm. A.W.Mabbitt and R.C.Goodfellow 274
Light-emitting diodes, high-speed high-power 1.06 μm gallium-indium-arsenide. A.W Mabbitt and C.D.Mobsby 157
Light-emitting diodes, single-heterojunction GaAs, influence of active-layer width on the performance of homojunction and. W.Harth, J.Heinen and W.Huber 23
Light guiding, stress-induced, in embossed waveguides. P.V.H.Sabine 501
Lightning-flash counter using pattern recognition to discriminate between ground and cloud flashes. D.Mackerras and T.L.Tillett 350
Line couplers, asymmetric nonuniform, coupling factor for 0°. J.P.Villotte and Y.Garault 208
Linear active circuits, node elimination in. M.G.Rezai-Fakhr and G.C.Temes 121
Linear controlled amnesic immittance elements and networks. N.R.Malin and G.L.Jackson 381
Linear discrete-time systems incorporating integral feedback, disturbance-rejection characteristics of. B.Porter and A.Bradshaw 27
Linear nonreciprocal circuits, an alternative algorithm for, tracking sensitivity:. P.R.Bryant 114
Linear quadratic optimal estimation and control with receding horizon. Y.A.Thomas 19
Linear-system reduction by continued-fraction expansion about a general point, comment on. R.Parthasarathy and H.Singh 193
Linear systems, improved algorithm for optimal stabilisation of. A.C.Pugh and A.K.Shelton 528
Linear systems with assigned eigenvalues, computer algorithm for optimal control of. S.Elangovan, G.Srinivasan and N.D.Rao 361
Linear time-invariant multivariable systems, disturbance localisation in. S.L.Shah, D.G.Fisher and D.E.Seborg Errata 156
Liquid-crystal display, laser-beam-addressed smectic, formation of synthetic images on a. M.Hareng and S.Le Berre 73
Liquid-crystal films, twisted nematic, effect of temperature on the transient response of. H.A.Tarry 339
Liquid crystals, large-angle beam deflector using. A.F.Fray and D.Jones 358
Load-line analysis of i.i.l.. M.I.Elmasry and R.D.Midha 68
Location of imperfections in optical glass-fibre waveguides. J.Guttmann and O.Krumpholz 216
Logic device, planar Gunn-effect, with two separated cathodes. M.Masuda, M.Nishida, M.Kimura and J.Koyama 320 Errata 568
Logic devices, 3-terminal transferred-electron, fabrication of, by proton bombardment for device isolation. L.C.Upadhyayula, S.Y.Narayan and E.C.Douglas 201
Logic drive circuit for 3-phase charge-coupled devices. C.H.Sequin 371
Logic gate, a fast flip-flop and: complementary Josephson-junction circuit. W.Baechtold, Th.Forster, W.Heuberger and Th.O.Mohr 203
Logic, nonsaturated integrated injection. M.I.Elmasry 63
Logical phase-controlled oscillator. J.D.H.Alexander 540
Logicfree data channels. D.Zissos Errata 52
Logics, stochastic and fuzzy. B.R.Gaines 188
Loss-angle measurements in open resonators, effect of mirror resistivity on. R.G.Jones 545
Low-frequency capacitance measurements. L.Muzii, A.Piccialli and S.Ravarino 487
Low-level radar propagation in coastal waters. R.G.Taylor and G.H.Glover 246
Low-loss open transmission line: the open ring line. A.Papiernik and C.Fray 209
Low-resistivity n-type layers in $InAs_xP_{1-x}$ by ion implantation. D.E.Davies, J.K.Kennedy and L.F.Lowe 462
Low-sensitivity control of nuclear reactors. M.M.Elmetwally and N.D.Rao 269
Lowpass-filter flat magnitude characteristic with sharp cutoff. V.Jovanovic and D.Rabrenovic 174
Luenberger observer design, new solution to a problem in. H.M.Power 65
Lumped capacitive loadings, optimal broadband cylindrical antenna with one and two. B.D.Popović, M.B.Dragovic and A.R.Djordjevic 99

M

M.E.S.F.E.T., GaAs, circuit model for the, valid to 12 GHz. G.C.Vendelin and M.Omori 60
M.E.S.F.E.T., high-speed 1μm GaAs. E.Kohn, R.Wuller, R.Stahlmann and H.Beneking 171
M.E.S.F.E.T., V-shaped-gate GaAs, for improved high-frequency performance. E.Kohn 160
M.I.C. TRAPATT oscillator for efficient S band operation. B.H.Newton 299
M.O.S. capacitor, technique for plotting nonequilibrium C/V curves of an. J.Olenski and P.Machalica 232 Errata 424
M.O.S.F.E.T.S, influence of the channel width on the threshold voltage modulation in. K.O.Jeppson 297
M.O.S. transistors, p-channel silicon-gate, nonuniform threshold voltage instabilities in. A.S.M.Watt and A.B.M.Elliot 559
M.S.I./L.S.I. logic subsystems, improvements for general-purpose s.s.i. logic packages and. S.L.Hurst 78
m sequence generation, high-speed: a further note. J.R.Ball, A.H.Spittle and H.T.Liu 107
m sequences, long, subjected to low-pass filtering, elimination of skewing in the amplitude distributions of. G.H.Tomlinson and P.Galvin 77
Magnetic-delay-line processor, power-spectral analysis using the. T.W.Cole 393
Magnetically tuned surface-acoustic-wave phase shifter. A.K.Ganguly, K.L.Davis, D.C.Webb, C.Vittoria and D.W.Forester 610
Magnetostatic-surface-wave propagation in a layered structure consisting of metals, dielectrics, a semiconductor and y.i.g., characteristics of. N.S.Chang, S.Yamada and Y.Matsuo 83
Majority-carrier traps in n- and p-type epitaxial GaAs. F.Hasegawa and A.Majerfield 286
Markov parameters and moments, minimal realisation of a symmetric transfer function matrix using. R.Parthasarathy and H.Singh 324 Errata 476
Mass-production-type GaAs IMPATT diodes in s.h.f. band. M.Miyazaki and M.Migitaka 437
Matrices, large sparse, and dynamical systems, numerical test of stability of. V.Zakian and C.Papaconstantinou Errata 32
Matrix patterns, basic T, for 2-port linear transformation networks in the real domain. J.Glover Errata 32
Measured signal/quantising-distortion ratio of high-information delta modulation. L.D.J.Eggermont 242
Measurement of the base resistance of bipolar transistors. G.C.M.Meijer and H.J.A.de Ronde 249
Measurement of the effective relative permittivities of microstrip. B.Bianco and M.Parodi 71
Medium-power GaAs field-effect transistors. I.Drukier, R.L.Camisa, S.T.Jolly, H.C.Huang and S.Y.Narayan 104
Microstrip components, planar waveguide model for calculating. G.Kompa and R.Mehran 459
Microstrip GaAs f.e.t. 11 GHz oscillator, alumina. N.A.Slaymaker and J.A.Turner 300
Microstrip line, capacitance, inductance and effective relative permittivity of. E.A.Shapoval 225
Microstrip line with a step discontinuity, dispersion, characteristic of a. S.Akhtarzad and P.B.Johns 310
Microstrip lines on magnetic substrates using 3-dimensional resonators, t.l.m. analysis of the dispersion characteristics of. S.Akhtarzad and P.B.Johns 130
Microstrip system for voltage-controlled phase equalisation for microwaves. M.Bramanti and L.Tarabella 434
Microwave-component support facilitating accurate connector alignment free from strain. L.K.Hepplewhite and N.Harris 575
Microwave frequencies, coaxial junction with 3-ports as a variable 2-port S parameter standard at. D.Woods 06
Microwave frequencies, novel approach to the production of band branching filters for. D.E.N.Davies, A.Y.Niazi and D.Lamensdorf 10
Microwave links in the Mendlesham propagation experiment, snow fading on 1 March 1974 on. R.L.O.Tattersall 603
Microwave modelling of h.f. Yagi antennas over real ground. P.S.Hall, B.Chambers and P.A.McInnes 187
Microwave oscillators, design of cavity-stabilised. R.Knochel and K.Schunemann 405
Microwave oscillators, InP, with 2-zone cathodes. K.W.Gray, J.E.Pattison, H.D.Rees, B.A.Prew, R.C.Clarke and L.D.Irving 402
Microwave p^+-n-p^+ BARITT diodes, efficient. J.Freyer and W.Harth 140
Microwave resonators, analysis of a wide range of: t.l.m. methods. S.Akhtarzad and P.B.Johns (Computer-program description) 599
Microwave-transistor power-amplifier design by large-signal y parameters. K.L.Kotzebue 240
Mildly suboptimal digital filters using a host windowing approach. G.D.Cain and A.H.Abed 493
Miniature ultra-broad-band voltage probe. R.H.Annandale and J.E.Carroll 620
Minicomputer environment, real-time, studies of cache store behaviour in a. B.D.Ackland and D.A.Pucknell 588
Minimal realisation of a symmetric transfer function matrix using Markov parameters and moments. R.Parthasarathy and H.Singh 324 Errata 476
Mixer performance at X band, integrated GaAs f.e.t.. R.A.Pucel, D.Masse and R.Bera 199
Mode transit times in near-parabolic-index optical fibres. M.J.Adams, D.N.Payne and F.M.E.Sladen 389
Model-matching technique, indirect, for multicontroller systems. S.G.Tzafestas 353
Model reduction using minimal realisation algorithms. Y.Shamash 385
Model reference adaptive control systems, stable, design techniques for. A.J.Udink ten Cate 347
Model, simple I/V, for short-channel i.g.f.e.t.s in the triode region. L.D.Yau 44
Models, low-order, for large-scale systems, aggregation matrices for a class of. J.Hickin and N.K.Sinha 186
Models, optimally aggregated, of high-order systems. J.Hickin and N.K.Sinha 632
Models, reduced-order, design of multivariable control systems using. S.K.Woon and S.A.Marshall 341
Models, reduced-order, eigenvalue assignment by. J.Hickin and N.K.Sinha 318
Modes, rectangular-ridge vibrational. T.M.Sharon, A.A.Maradudin and S.L.Cunningham Errata 356
Modifications of the Routh algorithm. M.I.Sobhy 450
Modulation, direct of D.H. GaAlAs lasers with GaAs m.e.s.f.e.t.s. V.Ostoich, P.Jeppesen and N.Slaymaker 515
Modulation, fast photoluminescence, for optoelectronic applications. U.Langman 490
Modulator, gyrator frequency. F.S.Atiya and M.H.Keriakos 226 Errata 475
Monotonic lowpass filters with maximum selectivity. B.M.Djurich 82
Moving-average output interface for digital stochastic computers. V.C.V.Pratapa Reddy 166
Multiclass problems, suboptimal method of feature selection and ordering for. P.J.Horne and E.H.Mamdani 17
Multilevel aperiodic Huffman sequences. P.S.Moharir 56
Multipole optical-fibre connector. J.Guttmann, O.Krumpholz and E.Pfeiffer 582
Multipurpose simulation networks with a single amplifier. C.E.Schmidt and Man Shek Lee 09
Multistable circuit using complementary field-effect transistors. M.M.Abu-Zeid and C.Kerssen 613
Multivariable 1st-order-type systems, compensation of. D.H.Owens 511
Multivariable control systems, design of, using reduced-order models. S.K.Woon and S.A.Marshall 341
Multivariable control systems designed using reduced-order models, stability of: further results. S.K.Woon 495
Multivariable discrete systems, gradient identification of. A.J.Udink ten Cate 98
Multivariable stochastic systems, design of digital controllers for. S.I.Ahson and H.Nicholson 122
Multivariable systems, design of, using unity-rank state feedback: further results. H.Seraji 34
Multivariable systems, eigenvalue/eigenvector assignment for. S.Srinathkumar and R.P.Rhoten 124
Multivariable systems, eigenvalue-eigenvector assignment for, and further results for output feedback control. S.L.Shah, D.G.Fisher and D.E.Seborg 388
Multivariable systems, linear time-invariant, disturbance localisation in. S.L.Shah, D.G.Fisher and D.E.Seborg Errata 156

N

n-user asynchronous arbiter. P.Corsini 01
Nachweis der unbedingten Aquivalenz der Verstarkergrundschaltungen mit Gegenkopplungsschaltungen (Complete description of the basic amplifier configurations by feedback action). M.Drosg 69
Negative-current mirror, wideband. B.Gilbert 126
Negative resistance at low temperatures, electroluminescent GaAs-$Ga_xAl_{1-x}As$ heterostructure diodes with. H.Beneking and A.Gattung 37
Negative-resistance oscillators, stability criteria for. J.O.Scanlan and T.J.Brazil 258
Negative resistance, transit-time-induced microwave, in $Ga_{1-x}Al_xAs$-GaAs heterostructure diodes. J.E.Sitch, A.Majerfield, P.N.Robson and F.Hasegawa 457

Negative resistance, voltage-controlled, in conductance transistors with hook structure. T.Tamama, Y.Mizushima and K.Daikoku 167
Network analyser employing surface-acoustic-wave discrete Fourier-transform processor. P.M.Grant, M.A.Jack and J.H.Collins 468
Network, multipurpose simulation, with a single amplifier. C.E.Schmidt and Man Shek Lee 09
Networks, 2-port linear transformation, in the real domain, basic T matrix patterns for. J.Glover Errata 32
Networks, ideal 2-port convertor, using operational amplifiers. J.Glover 94
Networks, ideal 2-port invertor, using operational amplifiers. J.Glover 137
Neuristor line, novel inductorless. B.M.Wilamowski, Z.Czarnul and M.Bialko 355
New broadband balun. H.Bex 47
New class of primary-feed antennas for use with offset parabolic-reflector antennas. A.W.Rudge and N.A.Adatia 597
New coupling method for GaAs-laser-fibre coupling. E.Weidel 436
New low-melting cholesterogens for electro-optical displays and surface thermography. G.W.Gray and D.G.McDonnell 556
New method of continuously measuring differential capacitance changes. B.Z.Kaplan, Y.Sagy and D.M.Jacobson 333
New millimetre-wave isolator containing a semiconductor rod in a circular waveguide. M.Kanda and W.G.May 261
New multiple feedback active RC network. D.J.Perry 364
New solution to a problem in Luenberger observer design. H.M.Power 65
New squared-magnitude function for digital bandpass filters. S.N.Hazra 315
Node elimination in linear active circuits. M.G.Rezai-Fakhr and G.C.Temes 121
Noise, 1/f, experimental results on fast surface states and, in m.o.s. transistors. G.Broux, R.Van Overstraeten and G.Declerck 97
Noise, 1/f, produced by radio-frequency current in resistors. E.J.P.May and W.D.Sellars 544
Noise, 1/f, variance fluctuations of. D.A.Bell and S.P.B.Dissanayake 274
Noise calculation, digital filter roundoff, using the driving-point impedance. R.Yarlagadda and K.E.Massad 360
Noise-cancelling microphone using a piezoelectric plastics transducing element. J.F.Sear and R.Carpenter 532
Noise-factor measurement of millimetre-wave IMPATT diodes by the superregenerative principle. J.Stevance and G.Cachier 591
Noise figure, 0.3 dB, v.h.f. f.e.t. preamplifier with. D.I.Hoult and R.E.Richards 596
Noise, Gaussian, performance of a multilevel d.c.p.s.k. system in the presence of interference and. R.Wood 152
Noise generators, zener-diode. P.I.Somlo 290
Noise, popcorn, and generation-recombination noise observed in ion-implanted silicon resistors. T.Koji 185
Noise ratio, signal/quantising-, upper bound on, for television d.p.c.m. systems. Z.S.Bojkovic 29
Noise, single-bit crosscorrelation function of single-bit bandlimited Gaussian waveform and two simultaneous reflections corrupted by. J.E.Howard 113
Nonlinear loads, transient response of antennas with. F.M.Tesche and T.K.Liug 18
Nonlinear quadrature model for a travelling-wave-tube-type amplifier. P.Hetrakul and D.P.Taylor 50
Nonlinear system, characterisation of the Volterra kernels of a. M.Gautier, M.Monsion and J.P.Sagaspe 351
Nonlinear systems, extension of Popov's steady-state absolute-stability frequency criterion of. Gh.Pilat Cartianu,Fl. 111
Nonsaturated integrated injection logic. M.I.Elmasry 63
Nonuniform threshold voltage instabilities in p-channel silicon-gate m.o.s. transistors. A.S.M.Watt and A.B.M.Elliot 559
Novel 3-terminal amorphous-semiconductor device. A.Madan, M.J.Thompson and J.Allison 496
Novel active hybrid circuit and its applications. S.B.Park 362
Novel approach to the production of band branching filters for microwave frequencies. D.E.N.Davies, A.Y.Niazi and D.Lamensdorf 10
Novel inductorless neuristor line. B.M.Wilamowski, Z.Czarnul and M.Bialko 355
Novel technique for r.m.s.-d.c. conversion based on the difference of squares. B Gilbert 181
Novel technique for the linearisation of charge-coupled devices. D.J.MacLennan and J.Mavor 222 Errata 312
Nuclear reactors, low-sensitivity control of. M.M.Elmetwally and N.D.Rao 269
Numerical check of g.t.d. near-field calculations for METEOSAT satellite. N.Chr.Albertson and P.Balling 491
Numerical comparison of two methods of designing insensitive controllers. C.S.Berger 489
Numerical simulation of the spectral responses and the I(V) characteristics of solar cells. L.M.Castaner Munoz 365
Numerical-solution methods for 2-dimensional bipolar-transistor-analysis algorithm, comparison of. C.R.Jesshope, E.J.Zaluska and H.Kemhadjian 285
Numerical solution of waveguide-antenna problems, use of the 'edge condition' in the. G.A.Hockham 418
Numerical solutions to the 2-dimensional time-dependent semiconductor equations. C.R.Jesshope 431
Numerical test of stability of large sparse matrices and dynamical stresses. V.Zakian and C.Papaconstantinou Errata 32

O

Observation of a peak in the negative-resistance/r.f.-voltage curve for high-low GaAs IMPATT diodes. B.Kramer and C.Balzano 509
Ohmic-contact layers, thin component, on GaAs, complex distribution effects of. B.L.Weiss and H.L.Hartnagel 263 Errata 396
Operational amplifiers, ideal 2-port convertor networks using. J.Glover 94
Operational amplifiers, ideal 2-port invertor networks using. J.Glover 137
Operational amplifiers, realisations of stable orthogonal networks (rotators and reflectors) with. J.Glover 409
Optical Barker sequences and self-orthogonal convolutional codes. P.S.Moharir 124
Optical coupling between thin films and circular fibres. P.J.R.Laybourn, C.A.Millar, G.Stewart and C.D.W.Wilkinson 02
Optical-fibre breaking machine, simplified. P.Hensel 581
Optical-fibre connector. J.F.Dalgleish and H.H.Lukas 24
Optical-fibre connector, multipole. J.Guttmann, O.Krumpholz and E.Pfeiffer 582
Optical-fibre excitation by finite beams. C.Pask and K.Barrell 270
Optical fibre, multimode, angular dependence of the mode-coupling coefficient in a. L.Jeunhomme and J.P.Pocholle 425
Optical fibre, multimode, with lossy cladding and lossy jacket, attenuation characteristics of. R.Roberts 529
Optical-fibre phase modulator. S.A.Kingsley 453
Optical fibre, self-focusing, impulse response of a. S.Nemoto and G.L.Yip 191
Optical fibres, multimode graded-index, effect of polarisation on pulse broadening in. J.A.Arnaud 554
Optical fibres, multimode, pulse propagation in. A.W.Snyder, D.J.Mitchell and C.Pask 275
Optical fibres, near-parabolic-index, mode transit times in. M.J.Adams, D.N.Payne and F.M.E.Sladen 389
Optical fibres of arbitrary (circularly symmetric) index profiles, leaky rays on. M.J.Adams, D.N.Payne and F.M.E.Sladen 238
Optical fibres with square-law core profile, cutoff wavelengths of guided modes in. C.G.Someda and M.Zoboli 602
Optical fibres, zero material dispersion in. D.N.Payne and W.A.Gambling 176
Optical filter, electrically tunable narrowband. H.A.Tarry 471
Optical glass-fibre waveguides, location of imperfections in. J.Guttmann and O.Krumpholz 216
Optical-repeater experiment, 100 Mb/s, employing graded-index fibres. K.Nawata, K.Takano, T.Ikegami and S.Ohara 583
Optical-transmission experiment at 400 Mb/s using a graded-index fibre. T.Ito, S.Machida, T.Ikegami and S.Ohara 375
Optical waveforms, fast-transition, photoconductive detector of. R.A.Lawton and A.Scavannec 74
Optical waveguides, bent, radiation from. A.W.Snyder, I.White and D.J.Mitchell 332
Optical waveguides, radiation losses from sinusoidal serpentine bends in. A.Ankiewicz 30
Optical waveguides, W-type slab, with core distortions, ray analysis of. S.Kawakami and S.Nishida 534
Optical waveguides with graded refractive index, dispersion in. S.Geckeler 139
Optics of propagation in the anisotropic space of an acoustic-surface-wave disc delay line. I.M.Mason, E.Papadofrangakis, J.Chambers and R.Ulrich 348
Optimal broadband cylindrical antenna with one and two lumped capacitive loadings. B.D.Popović, M.B.Dragovic and A.R.Djordjevic 99
Optimal control of linear systems with assigned eigenvalues, computer algorithm for. S.Elangovan, G.Srinivasan and N.D.Rao 361
Optimal estimation, linear quadratic, and control with receding horizon. Y.A.Thomas 19
Optimal, output feedback controllers, for time-multiplied performance indices. M.A.Zohdy and J.D.Aplevich 359
Optimal regulator, gain adjusting an. S.Mukhopadhyay 277 Errata 396
Optimal regulator with a prescribed degree of stability: a limiting case. D.Sarlat and Y.A.Thomas 411
Optimal stabilisation of linear systems, improved algorithm for. A.C.Pugh and A.K.Shelton 528
Optimally aggregated models of high-order systems. J.Hickin and N.K.Sinha 632
Optimisation of bilinear systems, descent algorithm for the. D.H.Owens 335
Optimum criteria for output interfaces in digital stochastic computers. A.J.Miller, A.W.Brown and P.Mars 326
Optimum digital phase-locked loops. A.J.Ruddell and A.M.Rosie 440
Optimum packet size for data networks with random channel errors. A.A.Shamim and J.C.Majithia 149
Optoelectronic applications, fast photoluminescence modulation for. U.Langman 490
OR/NOR, exclusive-, circuits, some novel. C.R.Edwards 03
Oscillations, low-frequency spurious, in impatt amplifiers and oscillators, elimination of the. M.G.Reggiani and F.E.Marchetti 539
Oscillations, parasitic, investigation of, in IMPATT-diode oscillators by a simple locus chart. J.J.Goedbloed 54
Oscillator, Gunn-diode, at 95 GHz. T.G.Ruttan 193
Oscillator, logical phase-controlled. J.D.H.Alexander 540
Oscillator, m.i.c. TRAPATT, for efficient S band operation. B.H.Newton 299
Oscillator, programmable acoustic-surface-wave. P.Hartemann 119
Oscillators, IMPATT, spurious oscillations in. G.S.Hobson and R.C.Tozer 291
Oscillators, negative-resistance, stability criteria for. J.O.Scanlan and T.J.Brazil 258
Oscilloscope, sampling, pulsed-laser application to. R.A.Lawton and J.R.Andrews 138
Outmigration of gallium from Au-GaAs interfaces. C.J.Madams, D.V.Morgan and M.J.Howes 574
Output feedback controllers optimal for the time-multiplied performance indices. M.A.Zohdy and J.D.Aplevich 359
Output interfaces in digital stochastic computers, optimum criteria for. A.J.Miller, A.W.Brown and P.Mars 326
Output-resistance properties of the GaAs Schottky-gate field-effect transistor in saturation. P.Rossel and J.J.Cabot 150
Oxidation, anodic, of GaAs, improved method of. H.Hasegawa, K.E.Forward and H.Hartnagel 53

P

p-n junction devices, forward-biased, alternative way for numerical steady-state analysis of. Ph.Leturcq and A.Munoz Yague 465
p^+-n-p^+ BARITT-diode design. J.A.C.Stewart 460
Packaging densities, extremely high, by operating integrated circuits with r.f. power. G.Krause 327
Parallel and pipeline computation of fast unitary transforms. B.J.Fino and V.R.Algazi 93
Parallel and simultaneous operation, determinacy of computation schemata for both. B.V.Howard 485
Parallel computation, relationship between maximal parallelism and maximal simultaneity in a directed-graph model of. D.Bain 629
Parallel thinning of binary pictures. C.Arcelli, L.Cordella and S.Levialdi 148
Parametric amplifier, hybrid. C.S.Aitchison and A.S.Wong 338
Parametric sideband amplification in injection lasers. P.Russer, H.Hillbrand and W.Harth 87
Partial input-output decoupling in time-delay control systems. S.G.Tzafestas and T.G.Pimenides 586
Particular universal function generator. J.C.Muzio 429
Passive-coded transponder using an acoustic-surface-wave delay line. D.E.N.Davies, M.J.Withers and R.P.Claydon 163
Pattern recognition to discriminate between ground and cloud flashes, lightning-flash counter using. D.Mackerras and T.L.Tillett 350
Performance of a multilevel d.c.p.s.k. system in the presence of interference and Gaussian noise. R.Wood 152
Permittivities of microstrip, measurement of the effective relative. B.Bianco and M.Parodi 71
Perturbation matrix in network design problems, applications of the. M.I.Sobhy and A.S.Deif 294
Phase and amplitude storage of an acoustic signal in a Schottky-diode correlator. A.G.Bert and G.Kantorowicz 523
Phase errors in transversal and recursive filters realised with charge-transfer devices. A.Chowaniec and G.S.Hobson 467

Phase-lock-loop statistics without recourse to Fokker-Planck techniques. J.H.Roberts 267
Phase-locked-loop, digital-, phase-error variance. A.J.Ruddell and A.M.Rosie 399
Phase-locked loops, optimum digital. A.J.Ruddell and A.M.Rosie 440
Phase-modulated signals, digital, carrier recovery technique for. J.D.H.Alexander 535
Phase shifter, magnetically tuned surface-acoustic-wave. A.K.Ganguly, K.L.Davis, D.C.Webb, C.Vittoria and D.W.Forester 610
Phasenselektiver Gleichrichter mit grosser Bandbreite (Wide bandwidth phase-sensitive rectifier). H.Gad 573
Photoconductive detector of fast-transition optical waveforms. R.A.Lawton and A.Scavannec 74
Photoluminescence modulation, fast, for optoelectronic applications. U.Langman 490
Pictures, binary, parallel thinning of. C.Arcelli, L.Cordella and S.Levialdi 148
Piezoelectric plastics transducing element, noise-cancelling microphone using a. J.F.Sear and R.Carpenter 532
Planar Gunn-effect logic device with two separated cathodes. M.Masuda, M.Nishida, M.Kimura and J.Koyama 320 Errata 568
Planar waveguide model for calculating microstrip components. G.Kompa and R.Mehran 459
Plane equiangular 4-arm spiral antenna with conical reflector. G.Grekou, G.Dubost and A.Madani 38
Polarisation on pulse broadening in multimode graded-index optical fibres, effect of. J.A.Arnaud 554
Poles and zeros, real, not expressible as the product of an RC and an RL function, RLC synthesis of certain functions with. S.Tirtoprodjo 357
Polynomials, multivariable, stability criteria for. D.D.Siljak 217
Popcorn noise and generation-recombination noise observed in ion-implanted silicon resistors. T.Koji 185
Power-amplifier design, microwave-transistor, by large-signal y parameters. K.L.Kotzebue 240
Power-amplifier stage, GaAs m.e.s.f.e.t. linear, giving 1W. R.L.Camisa, J.Goel and I.Drukier 572
Power-spectral analysis using the magnetic-delay-line processor. T.W.Cole 393
Power transistors, depletion m.o.s.. B.Farzan and C.A.T.Salama 565
Power transistors, n-p-n$^-$-n, quasisaturation-region operation of. S.P.Gaur 446
Practical minimum-capacitance very-low-frequency RC active network. G.Wilson 443
Prescriptive method for deriving control policy in a fuzzy-logic controller. E.H.Mamdani and N.Baaklini 625
Printed-circuit-board transmission-line transformer, design procedures for a. J.W.Chamberlayne 609
Probe, miniature ultra-broad-band voltage. R.H.Annandale and J.E.Carroll 620
Processing, radar doppler, using c.c.d. and s.a.w. devices. J.B.G.Roberts 525
Profile dispersion in multimode fibres: measurement and analysis. D.Gloge, I.P.Kaminow and H.M.Presby 469
Programmable acoustic-surface-wave oscillator. P.Hartemann 119
Propagating avalanche-zone mode for high-efficiency GaAs lo-hi-lo impatt structures. P.A.Blakey 630
Propagation experiment, Mendlesham, snow fading on 1 March 1974 on microwave links in the. R.L.O.Tattersall 603
Propagation, low-level radar, in coastal waters. R.G.Taylor and G.H.Glover 246
Propagation, pulse, in multimode optical fibres. A.W.Snyder, D.J.Mitchell and C.Pask 275
Proton bombardment for device isolation, fabrication of 3-terminal transferred-electron logic devices by. L.C.Upadhyayula, S.Y.Narayan and E.C.Douglas 201
Pseudonoise test signals and the fast Fourier transform. P.E.Wellstead 202
Pseudorandom 250 Mb/s modulation of GaAs l.e.d.s.. R.W.Dawson 144
Pulse broadening in multimode graded-index fibres. J.A.Arnaud 08
Pulse broadening in near-square-law graded-index fibres. J.A.Arnaud 447
Pulse propagation in multimode optical fibres. A.W.Snyder, D.J.Mitchell and C.Pask 275
Pulse, raised-cosine, synthesis of windows from. K.M.M.Prabhu, V.U.Reddy and J.P.Agrawal 161
Pulse, subnanosecond-, generator with variable pulsewidth using avalanche transistors. H.-M.Rein and M.Zahn 21
Pulsed-laser application to sampling oscilloscope. R.A.Lawton and J.R.Andrews 138
Pulsed measurement of BARITT-diode impedance against current and temperature. Th.G.van de Roer and J.J.M.Kwaspen 165

Q

Quartz disc delay line, y-cut, thermal characteristics of surface-wave recirculating loops on a. J.Chambers, E.Papadofrangakis and I.M.Mason 36
Quartz-resonator inductance. J.W.Burgess and A.J.L.Muir 502
Quasisaturation-region operation of n-p-n$^-$-n power transistors. S.P.Gaur 446
Quick accurate design of a frequency-stabilised coaxial dielectric resonator. P.Guillon, P.Choteau, J.Citerne and L.Raczy 570

R

Radar doppler processing using c.c.d. and s.a.w. devices. J.B.G.Roberts 525
Radar propagation, low-level, in coastal waters. R.G.Taylor and G.H.Glover 246
Radiation from a parallel-plate waveguide with a finite-corrugated flange. G.A.Hockham and L.M.Seng 292
Radiation from bent optical waveguides. A.W.Snyder, I.White and D.J.Mitchell 332
Radiation losses from sinusoidal serpentine bends in optical waveguides. A.Ankiewicz 30
Radiation pattern, gain and input impedance of a Yagi antenna, calculation of the. P.S.Hall, B.Chambers and P.A.McInnes (Computer-program description) 282
Radiation pattern of a corrugated conical horn in terms of Laguerre-Gaussian functions. C.Aubry and D.Bitter 154
Radiation patterns of a Yagi antenna above imperfectly conducting ground, calculation of (Computer-Program Description). P.S.Hall, B.Chambers and P.A.McInnes (Computer-program description) 550
Rain and cloud, attenuation by, on earth-sun paths at 12 to 71 GHz. P.G.Davies 547
Raindrops, spheroidal, on microwave scattering, effects of shape and orientation of. C.Warner 328
Rainfall, semiempirical law relating crosspolarisation discrimination to fade depth for. P.A.Watson and M.Arbabi 42
Rapid-response frequency measurement using analogue period processing. D.C.Cooper and J.M.Kelly 383
Ray analysis of W-type optical waveguides with core distortions. S.Kawakami and S.Nishida 534
Ray-tracing technique for evaluating the dispersion characteristics of graded-index cylindrical fibres. P.F.Checcacci, R.Falciai and A.M.Scheggi 633
RC immitances and periodically switched networks. L.Baker and S.D.Bedrosian 622
Real-time acousto-optical image conversion. B.Dalannoy, G.Thomin and M.Moriamez 334
Real-time crosscorrelation with linear f.m. surface-acoustic-wave filters. O.W.Otto and G.R.Nudd 643
Realisability of bandpass filters. J.Neirynck and Dao Manh Cuong 256
Realisation of open-circuit voltage-transfer matrices by grounded nullors. B.B.Stamenkovic 134
Realisations of stable orthogonal networks (rotators and reflectors) with operational amplifiers. J.Glover 409
Rectangular-ridge vibrational modes. T.M.Sharon, A.A.Maradudin and S.L.Cunningham Errata 356
Rectifier, wide bandwidth phase-sensitive. H.Gad 573
Reducing the effect of charge-transfer inefficiency in a c.c.d. video integrator. D.C.Cooper, E.H.Darlington, S.M.Petford and J.B.G.Roberts 384
Redundancy, 2-dimensional, consecutive reduction of. P.K.S.Wah 504
Reflection from cylinder in surface-wave field. A.L.Cullen 479
Reflector antenna, carbon-fibre composite, gain-loss measurements on a. K.M.Keen 234 Errata 396
Reflector, conical, and cavity, fitted into a structure, plane equiangular 4-arm spiral antenna with. G.Grekou and G.Dubost 169
Reflector, conical, plane equiangular 4-arm spiral antenna with. G.Grekou, G.Dubost and A.Madani 38
Reflector, offset, antennas, circularly polarised, beam squint in. N.A.Adatia and A.W.Rudge 513
Reflector, parabolic-, antennas, offset, new class of primary-feed antennas for use with. A.W.Rudge and N.A.Adatia 597
Relationship between maximal parallelism and maximal simultaneity in a directed-graph model of parallel computation. D.Bain 629
Residual distortion remaining after pre- or post-distortion. M.A.Gerzon 601
Resistance, base, of bipolar transistors, measurement of the. G.C.M.Meijer and H.J.A.de Ronde 249
Resistance, base spreading, comparison of noise-measured and theoretical value of, for an interdigitated transistor. K.F.Knott and R.T.Unwin 147
Resistive coupler. E.Rotholz 245
Resistors, 1/f noise produced by radio-frequency current in. E.J.P.May and W.D.Sellars 544
Resistors, ion-implanted silicon, popcorn noise and generation-recombination noise observed in. T.Koji 185
Resonator, frequency-stabilised coaxial dielectric, quick accurate design of a. P.Guillon, P.Choteau, J.Citerne and L.Raczy 570
Resonator, open, improvements in the beam-wave theory of the. A.L.Cullen 344
Resonators, acoustic-surface-wave planar, laser-probe analysis of field distributions within. I.M.Mason, J.Chambers and P.E.Lagasse 288
Resonators, $LiTaO_3$ plate, equivalent-circuit parameters for. J.W.Burgess, M.C.Hales and R.J.Porter 449
Resonators, microwave, analysis of a wide range of: t.l.m. methods. S.Akhtarzad and P.B.Johns (Computer-program description) 599
Resonators, open, effect of mirror resistivity on loss-angle measurements in. R.G.Jones 545
Reverse-biased p$^+$-n$^-$-n$^+$ junction at extreme currents. G.W.Neudeck 397
Rigorous derivation of computer-corrected network-analyser calibration equations. D.Woods 403
RLC synthesis of certain functions with real poles and zeros not expressible as the product of an RC and an RL function. S.Tirtoprodjo 357
Routh algorithm, modifications of the. M.I.Sobhy 450
Run-length coding method for black-and-white facsimile with a ternary code as an intermediate step. U.Rothgordt 101

S

S.A.W. fused-silica reflective-array compressor. C.Lardat 46
S parameter, variable 2-ports standard at microwave frequencies, coaxial junction with 3-ports as a. D.Woods 06
S.S.I. logic packages and m.s.i./l.s.i. logic subsystems, improvements for general-purpose. S.L.Hurst 78
Sampling sequences, nonuniform, interpolation and extrapolation in, with average sampling rates below the Nyquist rate. T.T.Fjallbrant 264
Satellite, switching, synchronisation-burst spectra for the. C.R.Carter and S.S.Haykin 158
Satellite, METEOSAT, numerical check of g.t.d. near-field calculations for the. N.Chr.Albertson and P.Balling 491
Sawtooth-voltage-waveform generator for extended-duration sweeps. B.L.Hart 64
Schottky, AuCr-nSi, and AuCr-n-p$^+$ Si Baritt diodes, effect of chromium thickness on. J.Narain, J.M.Borrego and R.J.Gutmann 178
Schottky-diode correlator, phase and amplitude storage of an acoustic signal in a. A.G.Bert and G.Kantorowicz 523
Schottky-diode memory correlator, simultaneous storage of spatially orthogonal acoustic beams in a. K.A.Ingebrigtsen 585
Scintillation limitations on the 2nd-phase-difference range measurement. E.Vilar 31
Self-regulating Picard-type iteration for computing the periodic response of a nearly linear circuit to a periodic input. T.B.M.Neill and J.Stefani 413 Errata 475
Self resonance in foil inductors. R.J.Kemp, P.N.Murgatroyd and N.J.Walker 337
Self-tuning regulator, generalisation of the. D.W.Clarke and P.J.Gawthrop 40
Self-tuning regulator, generalised, simulation of a. P.J.Gawthrop and D.W.Clarke 41 Errata 92
Semi-insulating properties of Fe-doped InP. Osamu Mizuno and Hisao Watanabe 118
Semiconductor, amorphous-, device, novel 3-terminal. A.Madan, M.J.Thompson and J.Allison 496
Semiconductor equations, 2-dimensional time-dependent, numerical solution to the. C.R.Jesshope 431
Semiconductor lasers, dynamic behaviour of. P.W.Boers, M.T.Vlaardingerbroek and M.Danielsen 206
Semiconductor layers, thin, on an insulating substrate, fast and nondestructive method of C(V) profiling of. M.Binet 580
Semiconductor rod, new millimetre-wave isolator containing a, in a circular waveguide. M.Kanda and W.G.May 261
Semiempirical law relating crosspolarisation discrimination to fade depth for rainfall. P.A.Watson and M.Arbabi 42
Sensitivity, tracking: an alternative algorithm for linear nonreciprocal circuits. P.R.Bryant 114
Sequence controllers, programmable, generalised model for. M.L.Rahman and M.E.Woodward 86
Signal analysis, a simple method for, transfer-function measurements on an engine suspension:. M.Garrigues and J.J.Urgell 133
Signal encoding for party-line digital data transmission. B.G.Taylor 454
Signal-error-feedforward-controlled amplifiers. K.B.Klaassen, R.J.de Kok and J.C.L.van Peppen 250 Errata 396

Signal-flow graphs not involving the complex variable s, algorithm for the evaluation of $(sI-A)^{-1}B$ from. I.C.Goknar 235
Signal/noise ratio for short integrated antennas. T.S.M.Maclean and P.A.Ramsdale 62
Signal/noise ratio of inductive-loaded antennas. P.A.Ramsdale 590
Silicone-clad fused-silica-core fibre. S.Tanaka, K.Inada, T.Akimoto and M.Kozima 153
Simple, I/V model for short-channel i.g.f.e.t.s in the triode region. L.D.Yau 44
Simple TRAPATT circuit for 2nd-harmonic extraction. C.D.Corbey 283 Errata 396
Simplified method for establishing determinancy in a directed-graph control structure. F.G.Heath and D.Bain 16
Simplified optical-fibre breaking machine. P.Hensel 581
Simulation, digital, of electronic components. D.N.Pim and J.M.Bullingham 441
Simulation network, multipurpose, with a single amplifier. C.E.Schmidt and Man Shek Lee 09
Simulation, numerical, of the spectral response and the I(V) characteristics of solar cells. L.M.Castaner Munoz 365
Simulation of a generalised self-tuning regulator. P.J.Gawthrop and D.W.Clarke 41 Errata 92
Simultaneous storage of spatially orthogonal acoustic beams in a Schottky-diode memory correlator. K.A.Ingebrigtsen 585
Single-bit crosscorrelation function of single-bit bandlimited Gaussian waveform and two simultaneous reflections corrupted by noise. J.E.Howard 113
Small-signal equivalent circuit for IMPATT transistors. A.Nguyen Quang 503
Snow fading on 1 March 1974 on microwave links in the Mendlesham propagation experiment. R.L.O.Tattersall 603
Solar cells, numerical simulation of the spectral response and the I(V) characteristics of. L.M.Castaner Munoz 365
Some BCH codes are optimum. D.A.Bell and R.Laxton 296
Some novel exclusive-OR/NOR circuits. C.R.Edwards 03
Spurious oscillations in IMPATT oscillators. G.S.Hobson and R.C.Tozer 291
Stabilisation least-squares inverse, of 2D recursive filters, counterexample in the. Y.Genin and Y.Kamp 330
Stability analysis of multistage feedback amplifiers in terms of element-perturbation theory. T.B.M.Neill 639
Stability criteria for multivariable polynomials. D.D.Siljak 217
Stability criteria for negative-resistance oscillators. J.O.Scanlan and T.J.Brazil 258
Stability of all moments of a particular stochastic system, criterion for the. J.L.Willems and D.Aeyels 272 Errata 396
Stability of large sparse matrices and dynamical systems, numerical test of. V.Zakian and C.Papaconstantinou Errata 32
Stability of multivariable control systems designed using reduced-order models: further results. S.K.Woon 495
Stability, optimal regulator with a prescribed degree of: a limiting case. D.Sarlat and Y.A.Thomas 411
Stability, Popov's steady-state absolute-, frequency criterion of nonlinear systems, extension of applicability of. Gh.Pilat Cartianu,Fl. 111
Stability theorem, frequency-domain, for the Lurie system with multiple nonlinearities specified by sector and slope information. P.C.Byrne 394
Stable model reference adaptive control systems, design techniques for. A.J.Udink ten Cate 347
Static characteristics of extremely thin gate oxide m.o.s. transistors. Y.Hayashi 618
Stochastic and fuzzy logics. B.R.Gaines 188
Stochastic system, criterion for the stability of all moments of a particular. J.L.Willems and D.Aeyels 272 Errata 396
Stochastic systems, multivariable, design of digital controllers for. S.I.Ahson and H.Nicholson 122
Stress-induced light guiding in embossed waveguides. P.V.H.Sabine 501
Stripline interdigitated couplers: analysis and design considerations. V.Rizzoli 392
Studies of cache store behaviour in a real-time minicomputer environment. B.D.Ackland and D.A.Pucknell 588
Subnanosecond-pulse generator with variable pulsewidth using avalanche transistors. H.-M.Rein and M.Zahn 21
Suboptimal method of feature selection and ordering for multiclass problems. P.J.Horne and E.H.Mamdani 17
Subthreshold velocity/field characteristic for epitaxial InP, temperature dependence of the. A.Majerfeld, K.E.Potter and P.N.Robson 81
Support, microwave-component, facilitating accurate connector alignment free from strain. L.K.Hepplewhite and N.Harris 575
Surface-acoustic-wave discrete Fourier-transform processor, network analyser employing. P.M.Grant, M.A.Jack and J.H.Collins 468
Surface-acoustic-wave filters, linear f.m., real-time crosscorrelation with. O.W.Otto and G.R.Nudd 643
Surface-acoustic-wave pulse transducer. G.Tobolka, H.Reichard and F.Seifert 561
Surface-acoustic-wave resonator filters with metallisation thickness, fine tuning of. W.H.Haydl and P.S.Cross 252
Surface-acoustic-wave resonators, band-elimination filter employing. Y.Koyamada, F.Ishihara and S.Yoshikawa 108 Errata 312
Surface morphology of liquid-phase-epitaxial InP. S.Guha, A.Majerfield, N.Moyes and P.N.Robson 303
Surface states, fast, and 1/f noise in m.o.s. transistors, experimental results on. G.Broux, R.Van Overstraeten and G.Declerck 97
Surface-wave propagation, magnetostatic-, in a layered structure consisting of metals, dielectrics, a semiconductor and y.i.g., characteristics of. N.S.Chang, S.Yamada and Y.Matsuo 83
Surface-wave recirculating loops on a y-cut quartz disc delay line, thermal characteristics of. J.Chambers, E.Papadofrangakis and I.M.Mason 36
Switched networks, periodically, RC immitances and. L.Baker and S.D.Bedrosian 622
Synchronisation-burst spectra for the switching satellite. C.R.Carter and S.S.Haykin 158
Synthesis of windows from raised-cosine pulse. K.M.M.Prabhu, V.U.Reddy and J.P.Agrawal 161

T

T.E.O. efficiency on NL product, dependence of. K.T.Ip and L.F.Eastman 301
T.L.M. analysis of the dispersion characteristics of microstrip lines on magnetic substrates using 3-dimensional resonators. S.Akhtarzad and P.B.Johns 130
Technique for plotting nonequilibrium C/V curves of an m.o.s. capacitor. J.Olenski and P.Machalica 232 Errata 424
Television d.p.c.m. systems, upper bound on signal/quantising-noise ratio for. Z.S.Bojkovic 29
Temperature compensation, wide-range, by addition two crystal-resonator frequencies: practical results with quartz and $LiTaO_3$. J.Brunner 304
Temperature dependence of the high-field velocity of electrons in n GaAs. P.A.Houston and A.G.R.Evans 210
Temperature dependence of the subthreshold velocity/field characteristic for epitaxial InP. A.Majerfeld, K.E.Potter and P.N.Robson 81
Temperature dependence of the velocity/field characteristic of electrons in InP. W.Fawcett and G.Hill 80
Thermal characteristics of surface-wave recirculating loops on a y-cut quartz disc delay line. J.Chambers, E.Papadofrangakis and I.M.Mason 36
Thermography, surface, new low-melting cholesterogens for electro-optical displays and. G.W.Gray and D.G.McDonnell 556
Threshold functions under the Walsh transform and linear translation, characterisation of. C.R.Edwards 563
Thyristors, dual-ring, two-dimensional computer design of. A.Silard, V.Marinescu and G.Manduteanu 641
Thyristors with amplifying gate, computer-aided experimental investigation of the correct turn-on. A.Silard and V.Marinescu 419
To compute the zeros of systems. Y.Shamash 212
Towards the theoretical design of splash-plate. G.L.James and D.P.S.Malik 593
Tracking sensitivity: an alternative algorithm for linear nonreciprocal circuits. P.R.Bryant 114
Transducer bonding with primed anaerobic acrylate sealant. R.L.Rosenberg 127
Transducer, surface-acoustic-wave pulse. G.Tobolka, H.Reichard and F.Seifert 561
Transfer function matrix, symmetric, minimal realisation of a, using Markov parameters and moments. R.Parthasarathy and H.Singh 324 Errata 476
Transfer-function measurements on an engine suspension: a simple method for signal analysis. M.Garrigues and J.J.Urgell 133
Transferred-electron devices, InP, transit modes of. D.Jones and H.D.Rees 13
Transferred-electron logic devices, 3-terminal, fabrication of, by proton bombardment for device isolation. L.C.Upadhyayula, S.Y.Narayan and E.C.Douglas 201
Transformation pattern on the AD-BC plane, further explanation of the continuous. J.Glover 75
Transformer, printed-circuit-board transmission-line, design procedures for a. J.W.Chamberlayne 609
Transforms, fast unitary, parallel and pipeline computation of. B.J.Fino and V.R.Algazi 93
Transient 2-dimensional simulation of a submicrometre gate-length m.e.s.f.e.t.. J.J.Barnes and R.J.Lomax 519
Transient response of antennas with nonlinear loads. F.M.Tesche and T.K.Liug 18
Transient response of lossy transmission lines. V.Dvorak 473
Transient thermal analysis of low-duty short-pulsed high-power TRAPATT diodes. H.C.Bowers and C.O.G.Obah 380
Transistor-fed thick folded dipole with large bandwidth at reception. J.P.Daniel, G.Dubost and J.Rospars 90
Transistor, interdigitated, comparison of noise-measured and theoretical value of base spreading resistance for an. K.F.Knott and R.T.Unwin 147
Transistors, avalanche, subnanosecond-pulse generator with variable pulsewidth using. H.-M.Rein and M.Zahn 21
Transistors, conductance, voltage-controlled negative resistance in, with hook structure. T.Tamama, Y.Mizushima and K.Daikoku 167
Transistors, extremely thin gate oxide m.o.s., static characteristics. Y.Hayashi 618
Transit modes of InP transferred-electron devices. D.Jones and H.D.Rees 13
Transit-time-induced microwave negative resistance in $Ga_{1-x}Al_xAs$-GaAs heterostructure diodes. J.E.Sitch, A.Majerfield, P.N.Robson and F.Hasegawa 457
Transitional Halpern-Thomson filters. S.M.Lazović and M.D.J.Radmanovic 229
Transmission line, low-pass open: the open ring line. A.Papiernik and C.Fray 209
Transmission-line transformer, printed-circuit-board, design procedures for a. J.W.Chamberlayne 609
Transmission lines, lossy, transient response of. V.Dvorak 473
Transmission lines, nonuniform coaxial, capacitance of. R.T.Irish 463
Transmission lines, two planar comb, directional coupler for gigahertz frequencies, based on the coupling properties of. D.J.Gunton and E.G.S.Paige 406
Transmitter noise and intermodulation, extended-dynamic-range measurements on. H.T.Al Hafid and J.G.Gardiner 636
Transponder, identity-, system using c.w. interrogation. C.D.McEwen 642
TRAPATT circuit, simple, for 2nd-harmonic extraction. C.D.Corbey 283 Errata 396
TRAPATT operation, high-efficiency, in X band. J.J.Purcell, M.R.Weatherhead, S.M.R.Gordon, C.H.Oxley and P.R.Wickens 236
Travelling-wave-tube-type amplifier, nonlinear quadrature model for a. P.Hetrakul and D.P.Taylor 50
Tunable X band GaAs f.e.t. amplifier. R.A.Soares and J.A.Turner 474
Tungsten-oxide films, hydrated, electrochromism in. R.Hurditch 142
Two-dimensional computer design of dual-ring thyristors. A.Silard, V.Marinescu and G.Manduteanu 641

U

Ultrasonic blood flowmeter yielding instantaneous velocity profile by real-time phase detection. M.Brandestini 183
Uniform diffraction solution for a discontinuity in curvature. G.L.James, G.Tong and D.A.Ross 557
Upper bound for signal/noise ratio for instantaneously companded delta-modulation systems. R.Steele and S.D.Cridge 145 Errata 248
Upper bound on signal/quantising-noise ratio for television d.p.c.m. systems. Z.S.Bojkovic 29
Use of edge condition in modal analysis of some discontinuities in waveguides. C.Vassallo 67
Use of the 'edge condition' in the numerical solution of waveguide-antenna problems. G.A.Hockham 418
Utilisation de l'effect de pointe dans l'analyse modale de certains obstacles en guide d'onde (Use of edge condition in modal analysis of some discontinuities in waveguides). C.Vassallo 67

V

V.H.F. f.e.t. preamplifier with 0.3 dB noise figure. D.I.Hoult and R.E.Richards 596
V-shaped-gate GaAs m.e.s.f.e.t. for improved high-frequency performance. E.Kohn 160
Varactor diode, GaAs, for u.h.f. t.v. tuners. Ikuo Niikura and Tohru Hara 391
Variance fluctuations of 1/f noise. D.A.Bell and S.P.B.Dissanayake 274
V_{ds} voltage capabilities of a diffused j.f.e.t. with a vertical-channel arrangement. J.L.Morenza and D.Esteve 172
Velocity/field characteristic of electrons in InP, temperature dependence of the. W.Fawcett and G.Hill 80
Velocity/field characteristic, subthreshold, for epitaxial InP, temperature dependence of the. A.Majerfeld, K.E.Potter and P.N.Robson 81

Very wideband corrugated horns. Z.Frank 131
Video integrator, c.c.d., reducing the effect of charge-transfer inefficiency in a. D.C.Cooper, E.H.Darlington, S.M.Petford and J.B.G.Roberts 384
Voltage-controlled negative resistance in conductance transistors with hook structure. T.Tamama, Y.Mizushima and K.Daikoku 167
Voltage-transfer matrices, open-circuit, realisation of, by grounded nullors. B.B.Stamenkovic 134

W

Walsh functions, digital xy position indicator using. J.Gordon 05
Walsh transforms and linear translations, characterisation of threshold functions under the. C.R.Edwards 563
Wave active filters. A.G.Constantinides and G.Haritantis 254
Wave active filters based on unit-element prototypes. Su-Ming Ng and W.H.Ku 578
Waveform, single-bit bandlimited Gaussian, and two simultaneous reflections corrupted by noise, single-bit crosscorrelation function of. J.E.Howard 113
Waveguide, 106 GHz low-loss beam. I.Anderson and J.T.Ruscio 213
Waveguide antenna problems, use of the 'edge condition' in the numerical solution of. G.A.Hockham 418
Waveguide model, planar, for calculating microstrip components. G.Kompa and R.Mehran 459
Waveguide, parallel-plate, with a finite-corrugated flange, radiation from a. G.A.Hockham and L.M.Seng 292
Waveguides, embossed, stress-induced light guiding in. P.V.H.Sabine 501
Waveguides, open-ended corrugated, crosspolar radiation from. C.G.Parini, P.J.B.Clarricoats and A.D.Olver 567
Waveguides, optical, with graded refractive index, dispersion in. S.Geckeler 139
Waveguides, two circular coaxial, evanescent and complex solutions in. I.I.Rabinowitz 415
Waveguides, use of edge condition in modal analysis of some discontinuities in. C.Vassallo 67
Wide-range temperature compensation by addition of two crystal-resonator frequencies: practical results with quartz and $LiTaO_3$. J.Brunner 304
Wideband GaAs Gunn reflection amplification for the 18-26.5 GHz waveguide band. J.G.de Koning, R.E.Goldwasser, R.J.Hamilton,Jun. and F.E.Rosztoczy 195 Errata 312
Wideband negative-current mirror. B.Gilbert 126

Y

Yomkost, indvokternost e zfectivnga dye-ecktrichyes kaga promitsaemostge mekropoloskovoi lenyii (Capacitance inductance and effective relative permittivity of microstrip line). E.A.Shapoval 225

Z

Z.F.E.S, design-parameter evaluation for class of preset. G.Prati, F.Russo and L.Verrazzani 280
Zener-diode noise generators. P.I.Somlo 290
Zener diodes, independent control of temperature coefficient and breakdown voltage in. B.Culshaw 499
Zero material dispersion in optical fibres. D.N.Payne and W.A.Gambling 176
Zeros of systems, to compute the. Y.Shamash 212
Zinc sulphide, electro-optic thin films of P.L.Jones and K.A.H.Al-Khateeb 262

Printed in England by Unwin Brothers Limited, Old Woking, Surrey
